

CMT ORANGE TOOLS®

CATALOGUE 2024 ENGLISH EDITION

Welcome to the 2024 catalogue

Dear Customer,

Thank you for your interest in CMT products.

Take a moment to browse our new catalogue and choose from an even wider range of innovative and state-of-the-art woodworking tools, from router bits, saw blades, jig and sabre saw blades, hole saws, and boring bits to oscillating tools, CNC cutters, cutter heads, chucks, power tools, and so much more!

A detailed list of spare parts on each product category is also provided to guide you through your purchase.

We continually strive to develop our technical know-how and make significant investments in research and development, but our greatest priority is customer care. A satisfied customer is worth more than any other achievement; therefore, each page of this catalogue contains CMT's highest commitment to the professional woodworker.

Should you not find a product that suits your needs, please let us know. Our highly skilled engineers and design technicians are always keen to assist you with your woodworking operations.

Thank you for your interest in CMT Orange Tools.

Blade Chart Abbreviations

- B** = Bore Diameter
- D** = Diameter
- K** = Kerf Thickness
- P** = Plate Thickness
- PH** = Pin Hole
- PITCH T** = $(D * 3.14) / Z$
- RPM** = Round per Minute
- T₁** = Workable Thickness
- V** = N° of Rakers
- Z** = N° of Teeth

- α = Hook Angle
- β = Type of Grind:
 - ATB** = Alternate Top Bevel Grind
 - CO / CONICAL** = Conical Teeth
 - FFT** = Flat Flat Trapezoidal
 - FLAT / FTG** = Flat Top Grind
 - FWF** = Flat with Alternate Chamfer
 - HDF** = Hollow Ground Teeth
 - Hi-ATB** = High Alternate Top Bevel Grind
 - HR** = Hollow Back Tooth Configuration
 - MATB** = Alternate Top Bevel with Chamfer Grind
 - MTCG** = Triple Chip Grind (Trapezoidal) with Chamfer
 - TCG** = Triple Chip Grind (Trapezoidal)

- BW** = Bevel Alternate (Metal Cutting)
- C/HZ** = Double Bevel and Flat (Metal Cutting)

Chart Abbreviations

- α = Axial Angle
- A** = Angle
- B** = Bore Diameter
- D / D₂ / d** = Diameter
- H** = Cutting Depth
- l / l₁** = Cutting Length
- K** = Thickness
- L / L₁** = Overall Length
- LB** = Relative Length
- R / R₁** = Radius
- RPM** = Round per Minute
- S / S₁** = Shank Diameter
- T₁** = Workable Thickness
- TPI** = Teeth per Inch
- TS** = Tooth Spacing
- V** = N° of Spurs
- W** = Width
- Z** = N° of Teeth

CMT HISTORY

CMT headquarters in the 1970's

CMT LOGO EVOLUTION

Hello there!

My name is **CMT ORANGE TOOLS**, I am the brand name of a dynamic Italian company which I am proud to tell you about. I was born in **1962** thanks to the initiative of my creator and company founder, Osvaldo Tommassini.

By the way, **CMT** stands for Costruzioni Meccaniche Tommassini. Over the years, my appearance has changed significantly.

In **1991** and **1997**, my two brothers (Bit and Blade) were born and following them, many others.

Orange by birth, together we make a great team and are synonymous with quality!

Today, after much hard work, our name has gone global so much so that our photo is registered in Trademark offices around the world.

Present in 90 countries around the world, our family has grown, the result of undying enthusiasm and above all,

the color **ORANGE!**

**MADE IN ITALY
SINCE 1962
60 YEARS
AND STILL
GOING STRONG!**

By now, the story has been told. After over 60 years of success and quality in manufacturing woodworking tools - orange woodworking tools, to be precise - word just sort of gets around. We have grown and we have changed, but one thing still remains the same: our commitment to making only the highest quality woodworking tools.

OUR BRANCHES

Pesaro, Italy

Udine, Italy

Greensboro, United States

Valencia, Spain

OUR TOOLS So, what does it take to make a CMT tool? Like all things of quality, it's not only what you do but how you do it. And anyone who works wood knows that you get out of a piece only what you put into it, and it is no different when manufacturing a tool. You choose your designs and materials carefully and you work using all of your skill and know-how. You'll be happy to know that's what we do at CMT too.

OUR TRADEMARK COLOR ORANGE

As the story goes, we began small. We also put orange color surface coating on our tools, then we put our tools on the market and soon our orange tools were all over the world. Now, any woodworker anywhere in the world can tell you that orange tools means CMT, and that CMT means quality. Here at CMT we know we produce quality. You should too. That's why we have trademarked the color orange on woodworking tools - it's your guarantee that you are getting a genuine high-quality CMT product.

DESIGN

Everything starts with a clear idea and having the potential to express it. We have both. At CMT, our technical department uses the best of both worlds - computer technology and hands-on experience - to engineer and design each tool so that it performs flawlessly each time you use it, and to guarantee that you'll be using it for a long, long time.

MATERIALS

Turning a design into a finished product means finding the right material that will do the job and that lives up to the specifications set out in the design - quality performance from the final product depends on it. When it comes to selecting raw materials, we don't cut corners.

At CMT, we know that high quality tools come only from high quality raw materials, so we use only solid bar stock steel and specially formulated micrograin carbide to manufacture our bits and blades.

Loading the automated multi-axis CNC sharpening machines.

MANUFACTURING

Like we said, it's not just what you do but how you do it. Over the years we have continuously invested in the latest technology in CNC machining equipment and innovative software to manufacture our tools. The result is that now our entire manufacturing process, from turning and milling the steel shanks to brazing and sharpening the carbide cutting tips, is completely automated. And since a machine is only as intelligent as the person using it, everything is operated by specifically trained operators.

THE FINAL TOUCH

A tool simply wouldn't be a CMT tool if it didn't have the trademark orange color non-stick P.T.F.E. coating on it. This unique industrial strength surface coating is designed to withstand the physical stresses the tool undergoes during use while protecting it from residue build-up and burning. And we really like the orange color too.

QUALITY CONTROL

Nobody's perfect, but we're trying. CMT uses rigorous quality control programs and the latest generation machining equipment to ensure that each bit has been manufactured with precision and accuracy and that it will give the long-lasting performance you expect from a **CMT ORANGE TOOL**. Our tools are manufactured in compliance with European Standard EN 847 published and enforced by the CEN (European Committee for Standardisation).

WE RECYCLE

CMT filters and purifies its water using a reverse osmosis system located inside the plant. Also the oil used in grinding and machining our tools must be clean and absolutely free of contaminants. Clean oil, after enough use, gets dirty, so we filter and reprocess dirty oil on the premises. This is our way of guaranteeing the quality of the oil we use, as well as contributing to help protect the environment.

LOGISTICS & SERVICES

CMT offers a wide product range with over 7000 different standard tools, but that still isn't enough to achieve 100% customer satisfaction. It's a top priority to process orders and ship the same day. That's why CMT factories worldwide are equipped with 20+ automated vertical storage systems programmed to expedite and simplify order and delivery.

The tools you need, in-stock and ready for prompt shipment within 24 hours. What does this translate to for customers? Quick and efficient service exceeding customer satisfaction and branding our success.

Maximize Your HW Saw's Performance

BLADE RANGE	ORANGE CHROME®	XTREME	INDUSTRIAL		ITK PLUS®
PERFORMANCE	★★★★★	★★★★★	★★★★★	★★★★★	★★★★
PACKAGING	CARTON BOX + COLORED LABEL		CARTON BOX	CARTON BOX + COLORED LABEL	PLASTIC CLAMSHELL
STEEL PLATE	LASER-CUT PREMIUM QUALITY STEEL PLATE BODY Made with 46-48 HRC premium quality harmonic steel from Germany and laser-cut to perfection providing tighter tolerances translating to longer life and accurate cutting ability.			LASER-CUT HIGH QUALITY STEEL PLATE BODY Made with 44 HRC high quality steel and laser-cut to ensure longer life and precision cutting.	
EXPANSION SLOTS	LASER-CUT HEAT EXPANSION SLOTS Engineered to allow the blade to resist deformation from increases in temperature due to cutting applications and centrifugal forces.				
SOUND DAMPENING SLOTS	LASER-CUT SOUND DAMPENING SLOTS POLYMER-FILLED Slots filled with sound-dampening polymer reduce vibrations and noise by 25% compared to blades without it.*	LASER-CUT SOUND DAMPENING SLOTS Slots reduce vibrations and noise by 10% compared to blades without it. *This feature improves cut quality and extends blade life. *In full compliance with National Noise Emission Standards and Regulations.			
TENSIONING RING	TENSIONING RING A visible tensioning ring on blade body provides stability during the cut and perfect concentricity during rotation. For improved performance, tensioning is fine-tuned according to machine/application.			×	×
BRAZING	TRI-METAL BRAZING Silver-Copper-Silver Tri-Metal Brazing prevents carbide from breaking during the cooling process and allows teeth to withstand high stress and impact especially when cutting harder woods and composite materials.	SILVER BRAZING Silver Alloy Brazing prevents carbide from breaking during the cooling process and allows teeth to withstand high stress and impact especially when cutting harder woods and composite materials.			
CARBIDE TEETH	INDUSTRIAL CHROME CARBIDE Cutting teeth are made from a specially formulated chrome carbide which stays sharper longer by reducing cutting edge abrasion, improving cut quality and tool life.	INDUSTRIAL SINTERHIP HI-DENSITY CARBIDE The SINTERHIP sintering process (Hot Isostatic Pressing) uses high temperature (up to 3500°F) and high pressure (up to 1500 psi) to fully consolidate carbide thereby resulting in a porosity-free product ensuring longer cutting life over traditional carbide and less risk of breakages.			
SHARPENING	PRECISION MIRROR FINISH SHARPENING Each tooth is precision ground on a multi-axis CNC machine creating perfect edge angles that provide extra-clean cutting performance and extended life. Featuring less than 0.25 µm Rmax in edge roughness.	PRECISION SHARPENING Each tooth is precision ground on a multi-axis CNC machine creating perfect edge angles that provide extra-clean cutting performance and extended life. Featuring less than 0.35 µm Rmax in edge roughness.		SHEAR ANGLE SHARPENING The shear angle grinding, on the front face of the teeth, reduces the required cutting force thereby allowing for smoother cutting.	
COATING	ORANGE CHROME® COATING - Protects the tool against corrosion, rust and accumulation of resin and residues. - Guarantees longer tool life. - Lower power absorption by motor. - Smoother blade movement throughout cutting operation. - Tool maintenance is fast and easy.	HARD LAQUERING Protects against corrosion and rust.			ORANGE SHIELD® NON-STICK PTFE COATING - Protects against corrosion and rust. - Reduces resin and residue build-up. - Reduces overheating and blade drag. - Improves performance and cutting life.
BALANCING	CMT XTREME BALANCING™ This system allows for extremely accurate dynamic balancing of the blade, several orders of magnitude above and beyond that which is currently available in the marketplace. *TRADEMARK & INT. NEW PRODUCTION FACILITY IN UDINE, ITALIA

We are honored to announce the appointment of Piergiorgio Pozzo as Head of the Saw Blade Division at our new, highly technological production plant, based in Udine.

Mr. Pozzo's experience stems from a long-standing commitment to and success in the development of high-performance industrial blades.

Thanks to a rich and extensive knowledge in the field, Mr. Pozzo and his team have successfully patented a brand-new saw blade line of outstanding quality.

QUALITY ACCORDING TO CMT

Quality can take on different meanings, at times it may relate to the appearance of a product, other times to the number of features or the materials used to make it and so on. Circular saw blades are technical items, tools dedicated to the realization of intermediate workings that if carried out impeccably, enable the manufacturing of the highest-quality finished products with the best production efficiency. Based on this principal, CMT manufactures saw blades using the functional quality concept, this being that every detail of the saw blade, from its design to the choice of materials to its manufacturing cycle, is finalized to give the best performance in the true-life use of the tool. As such, the features of our saw blades are always functional and are found on the product only if and when they bring a true benefit to reaching the established performance target. Should any of the saw blade features fail to do so they will be purposely omitted; the same applies to the tools' manufacturing work cycle which in turn makes it possible for CMT to focus its resources and on what really represents value for the user. The quality embedded in our products is the result of a school of thought which is shared and embraced by the people who make them, and this culture is relentlessly cultivated and improved. Quality at CMT also means respect for people and the Earth.

STEEL PLATE

The body of a blade is an integral part of blade design; cutting quality and longevity depend on it. We use only the highest quality steel available, so durable and tough that it will not only withstand heavy workloads, but also be flexible enough to bend without breaking.

LASER CUT

All our blanks are laser cut; this allows us to use harder harmonic steels for the blade bodies, which in return generates extremely rigid and stable saw blades, guaranteeing perfect flatness. In addition, we are able to engineer quieter tools using a very narrow laser beam to cut expansion and vibration dampening slots.

EXPANSION SLOTS

Engineered to allow the blade to resist deformation from increases in temperature due to cutting applications or centrifugal forces.

LASER-CUT SLOTS FILLED WITH SOUND-DAMPENING POLYMER

Slots filled with sound-dampening polymer reduce vibrations and noise by 25% compared to blades without it (only the "Orange Chrome" series feature polymer-filled sound dampening slots). This feature improves cut quality and extends blade life.

In full compliance with National Noise Emission Standards and Regulations. (Expansion slots not enhanced by polymer filling, reduce vibration and noise by 10%).

CMT XTREME BALANCING*

* TRADEMARK & INT. PAT. PEND.

This system allows for extremely accurate dynamic balancing of the blade, several orders of magnitude above and beyond that which is currently available in the marketplace.

Each blade undergoes rigorous assessment and only in the event that micro imbalance is detected will the appropriate correction holes be applied.

You may find 1 to 5 micro balancing holes on your blade, depending on the degree of micro imbalance (fig.1). When in perfect balance, a single incision will appear on the blade as proof of balance (fig.2).

These holes will have no effect on the technical properties of the blade during use (such as an increase in noise**, chip build-up at the correction site, etc.).

This translates to precise cutting, longer blade life, reduced vibration and noise, and less wear and tear on your machine components.

**Results are based on tests conducted by an independent laboratory.

These results are available for download on our website.

Fig. 1
Example of balancing holes.

Fig. 2 Example of inspected blade already in perfect balance.

**CMT XTREME
BALANCING**

TENSIONING RINGS & FLATTING

To ensure maximum performance, flattening and plate tensioning processes are performed. Every single blade is subject to a flattening process in order to achieve the highest flatness tolerance. The blade body then undergoes tensioning in order to enhance stiffness and stability.

A well-marked and visible ring is applied to the blade body by means of compression and with a predetermined force linked to the intended application and working conditions of each blade.

Tensioned Blade = Stable Blade

Untensioned Blade = Vibrations

CARBIDE TEETH

Tips require optimum quality carbide. Different applications call for different grades. Our Research and Development Team has evaluated and tested carbide grades and tracked their yield on performance both in house and in the field. We have access to the widest range in the world and only use top premium quality carbides.

TRI-METAL BRAZING

Brazing is the process of attaching a hard metal plate to the steel body of the blade. This is performed by using a bonding metal, which once melted, acts as a binder between the two parts. The bonding material used for brazing is a trimetallic alloy formed by silver, copper and silver, which not only serves to effectively attach the two parts together but whose fundamental properties create a shock-absorber effect protecting the cutting edges during routing operations.

CMT Orange Tools

SHARPENING & CUTTING ANGLES

Sharpening is imperative to the production process of the blade and equally important with respect to the project in mind and material in use. Fully automated and numerically controlled grinding machines tooled with extra-fine-grained diamond wheels allow any type of angle and shape of the tooth. The right choice of these parameters will guarantee cutting edge lifetime and ultimately the best finish on the finished part.

COATING

Quality coatings can be extremely effective in certain applications. CMT uses the following:

ORANGE SHIELD® COATING: a registered and trademarked non-stick protective coating bearing our characteristic orange color. A technopolymer (P.T.F.E. is spray-applied to the blade body then baked to enhance its protective properties. Chemical compounds cannot attach this coating, it remains insoluble in water and solvents, is completely non-stick and diffuses and disperses heat.

ORANGE CHROME® COATING: this is a coating composed of a thin layer of chromium, which is electrolytically deposited on the blade in order to increase wear resistance when in contact with highly abrasive material. Surface hardness increases considerably, guaranteeing long-life and incredible resilience to corrosion and rust.

LASER MARKING & SCREEN PRINTING

All CMT blades are identifiable by means of a latest generation indelible laser marking or multicolored screen-printing, a sophisticated automated technology that guarantees striking and versatile results.

FINAL TESTING AND QUALITY CONTROL

Following design and manufacturing phases, each new model is tested to ensure maximum performance during the work phase. The entire production process is subject to meticulous quality controls using conventional and sophisticated measuring system.

NEW PACKAGING

- Blade packaging is made from strong and sturdy cardboard, reusable and environmentally friendly.
- Package information updated in 12 languages.
- New colored labels offer useful technical information such as application, materials and machine compatibility.

HOW TO CHOOSE A BLADE IN THE NEW CMT CATALOGUE

1

WHAT'S THE MATERIAL YOU WANT TO CUT?

- WOOD**
- NON-FERROUS**
- METAL & STEEL**
- MULTI-MATERIALS**

See table on page 5

2

WHAT'S THE APPLICATION?

- RIPPING
- RIPPING & CROSSCUT
- FINISHING
- FINE FINISHING
- ULTRA FINE FINISHING
- etc

See table on page 5

3

WHAT ARE THE PERFORMANCE EXPECTATIONS?

4

WHAT MACHINE ARE YOU USING?

BASED ON YOUR MACHINE, CHOOSE THE APPROPRIATE BLADE:

- DIAMETER (D)
- BORE (B)

SUGGESTIONS FOR CHOOSING THE RIGHT BLADE:

HOOK ANGLE α

- Wood, Solid Surface ($\alpha = 10^\circ \sim 25^\circ$)
- Chipboard, MDF, Plywood, Laminate, Plastic ($\alpha = 5^\circ \sim 15^\circ$)
- Chipboard, MDF, Non-Ferrous, Metals ($\alpha = 0^\circ \sim 10^\circ$)
- Metals, Non-Ferrous, Plastic, Laminate ($\alpha = -5^\circ \sim -15^\circ$)

TEETH SHAPE

- Wood, Chipboard, MDF, Plywood

- Laminate, Chipboard, MDF, Plywood, Plastic TRESPA®

- Metals

- Special Application/Materials

- HDF**
- FLAT+ATB**
- CO+FLAT**
- MTCG**
- MATB**
- HR**

SUGGESTIONS FOR BLADE USE:

In order to achieve the best cut possible, that is without modifying the predetermined angle of entry/exit, it is important that the portion of the blade (**H**) which extends beyond the workpiece during the cut, be close to equal to the height of an entire tooth (approx. 8/10mm). To improve the finish, it is possible to make small adjustments by increasing or decreasing this height.

The number of teeth simultaneously engaged in cutting the material (**Teeth Cutting or Z_p**) must be constant as the thickness (**S**) of the material varies.

As with $Z_p < 3$, the cutting quality is not guaranteed.

With the same diameter, and when cutting thicker material, ensure to use a blade with less teeth (or with a greater Pitch **P**) or vice versa ($S = [P \times Z_p] / 1.414$).

Thin blades are suitable for thinner materials. They also require less power during operation, and are ideal for battery-operated machines.

Thick blades, which are more robust, are suitable for precision cutting in thicker materials but obviously require more power.

The blade Pitch (**P**), or the distance between each tooth, is calculated in the following way:

$$P = \frac{D \times 3,14}{Z} \quad \begin{matrix} D = \text{Blade Diameter (mm)} \\ Z = N^\circ \text{ of Teeth} \end{matrix}$$

HW MEC

★ ★ ★ ★ ★

PERFORMANCE

WOOD

TECHNICAL DETAILS:

The rakers prevent contact between the steel plate body and the material in use.

Thin Kerf minimises materials wastes.

MACHINES

Blade diameter compatibility is contingent on machine type.

277 INDUSTRIAL

WOOD

TECHNICAL DETAILS:

The rakers prevent contact between the steel plate body and the material in use.

Mounted on the sides of gang rip saws, these act as shoulder saw blades and ensure stability, reducing vibration under extreme work load.

WOOD

NANO GRAIN CARBIDE

Cutting teeth are made from an exclusive high-pressure sintering and the use of nano grain carbide powders make the material free of porosity, extremely hard and compact, with excellent tenacity that ensures greater resistance to wear as compared to others and exceptional durability.

235 X-TREME ALL-ROUND

50X
LONGER LIFE
THAN CARBIDE

MACHINES

Blade diameter compatibility is contingent on machine type.

MATERIALS

NO LIMITS: CUT ALL WITH ONE BLADE!

X-TREME-NOISELESS

Thanks to the new minimization of gullets design this blade succeeded in reducing the noise of idling by up to 15 dB(A) compared to conventional carbide saw blades. With a noise level of just around 70dB(A) when idling, the wearing of hearing protection is outdated.

X-TREME-ALL-ROUND

New industry standard with universal application in countless materials and suitable for all chop saws and portable machines, table and vertical panel sizing saws, CNCs and through-feed installations

X-TREME-QUALITY

The special hollow back tooth configuration (HR) guarantees an excellent cutting quality.

X-TREME-FAST

The teeth are surprisingly thin! The cutting width is a mere 2,5 mm and they generate noticeably lower cutting pressure and therefore also require less power during usage. Resharpenable max 2 times.

X-TREME-LIFETIME

The lifetime is 20X longer than carbide blades thanks to the diamond tips.

RECOMMENDED USE

We recommend the use of a splitting wedge between **2,0** and **2,4**mm in thickness.

LONGER LIFETIME THANKS TO DIAMOND TIPS Clean your circular saw blades on a regular basis. You will profit from a long-lasting and precise cutting quality and maximize the lifetime of your innovative saw blades many times over.

- It is not recommended to use the saw blades for longitudinal cuts in soft wood and material thicknesses of more than 40mm.
- Do not cut materials with nails, stone and metal parts.
- Chip-free cuts can only be guaranteed in combination with a suitable scoring saw blade.

Dado Grooving

230.5

CMT designed a new Dado Precision Set with the following features:

- New Setting Points for chippers alignment.
- For flat bottom grooves & virtually splinter-free cuts in solid wood, laminates & melamines, veneer plywood.
- Includes shims (plastic & magnetic) and plastic "lock spacers" set for micro-thin adjustability.
- Orange Shield Coating protect from heat, gumming and corrosion.

PERFORMANCE

WOOD

NOT FOR

Always use both outside blades. Never use the chippers by themselves, or with only one outside blade. Securely fasten CMT Dado on machine using manufacturer's recommended dado arbor nut.

MATERIALS

MACHINES

230.524.08 SET INCLUDES:

- A - Left Outside Blade (qty: 1)
- B - Right Outside Blade (qty: 1)
- C - Chippers 1/8" (qty: 4)
- D - Spacers 1/16" (qty: 2)
- E - Shims 0.004" (qty: 5)
- F - Shim 0.008" (qty: 1)
- G - Magnetic Shim 0.012" (qty: 1)
- H - Magnetic Shim 0.020" (qty: 1)

SPARE PART SET: 299.000.09

230.520.06 It include same components but C (qty: 3); D (qty: 3)

230.312 INTERNATIONAL PATENT PENDING

CMT is proud to introduce a brand new Locked Dado Pro Set unlike any other! This is the very first Dado ever deemed UNI EN847 compliant. This means that while the Dado is rotating, the assembled elements will never come into contact with each other! This is possible thanks to unique blade body design and 'never before seen' special "lock spacers".

FEATURES:

- For flat bottom grooves & virtually splinter-free cuts in solid wood, laminates & melamines, veneer plywood.
- Includes shims (plastic & magnetic) and plastic "lock spacers" set for micro-thin adjustability.
- Compatible with most radial arm saws and stationary table saws, including SAWSTOP®.
- Easy pre-assembly out of machine. Once stacked, no alignment necessary.
- Cutting teeth/assembled elements never come in contact each other, even when brake safety system kicks in.

WOOD

Always use both outside blades. Never use the chippers by themselves, or with only one outside blade. Securely fasten CMT Dado on machine using manufacturer's recommended dado arbor nut.

MATERIALS

MACHINES

Sturdy reusable carrying case

SET INCLUDES:

- A** - Left Outside Blade 203mm (qty: 1)

MULTI-MATERIALS

SECURED TOOTH – MORE RESISTANT TO ACCIDENTAL CONTACT

Teeth are welded deep inside blade body which significantly reduces breakage caused by accidental contact with terrain, rocks or stones, masonry work, metal parts, etc.; avoid all contact with these elements wherever possible.

HEAVY DUTY PLATE – THIN, LIGHT AND STRONG

Cut from the finest steel. Remarkably thin kerf and specifically designed perforations considerably reduce blade weight thereby reducing tool workload.

SAFETY WARNING

Circular saw blades are suitable for thinning brush and cutting small trees up to a diameter of 5 cm (2 in) in thickness. Do not attempt to cut trees with larger diameters, since the blade may catch or jerk the clearing saw forward. This may cause damage to the blade or loss of control of the power tool and result in serious injury. Use a chain saw for such work. The operator shall ensure, while working, that no persons or animals come within 15 meters (50 feet) of the tool while in operation. Inspect the work area: remove stones, rocks, pieces of metal and other solid objects which could be thrown by the cutting attachment causing damage to objects or injury to those in close proximity. To reduce the risk of blade/teeth breakage, avoid all contact with terrain, rocks or stones, masonry work, metal parts, etc.

If you're looking for fast and easy saw alignment and balancing, the cut calibration and sanding disk is for you. First, mount your calibration and sanding disk in your table saw and line it up with a square for accuracy. Then, remove the calibration and sanding disk and mount your saw blade for true precise cuts. You can also use the calibration and sanding disk as a sander by simply attaching self-stick sandpaper and installing the disk in your table saw.

QUALITY MATERIALS FOR OUTSTANDING PERFORMANCE

Designed and crafted using state-of-the-art processes as well as high-tech machinery these jig saw blades carry out precise cuts on a variety of materials: soft & hardwood, plywood, OSB, laminates, plastics, HPL, multiplex panels, metals, ferrous & non-ferrous materials, aluminium, Fibreglass as well as stainless steel. CMT jig saw blades come in four different materials made to outperform the competition and deliver impressive results.

GEOMETRY IS IMPORTANT!

MILLED & SIDE SET TEETH

MILLED & SIDE SET TEETH

Jig saw blades featuring this kind of geometry produce a quick rough cut into soft/hardwood, aluminium, plastic and non-ferrous metals.

MILLED & WAVY SET TEETH

MILLED & WAVY SET TEETH

Suitable for fine straight cuts into plywood, soft steel, aluminium, non-ferrous metals and plastic.

GROUND & SIDE SET TEETH

GROUND & SIDE SET TEETH

Best for quick cuts in wood.

GROUND & TAPER GROUND TEETH

GROUND & TAPER GROUND TEETH

This geometric attribute creates fine, clean and precise cuts in wood and plastic.

HIGH CARBON STEEL

Great for cutting wood, fiberboard and plastic.

BI-METAL WITH 8% COBALT

Premium bi-metal with 8% Cobalt provides superb results and guarantees long life when cutting metal, non-ferrous, plastic and wood with nails.

HIGH SPEED STEEL

For cutting harder materials, such as metals, aluminium and non-ferrous metals.

TUNGSTEN CARBIDE TIPPED

For cutting fibercement board, brick, porous concrete, plasterboard, MDF, Fibreglass and ETERNIT®.

THE RIGHT BLADE FOR THE BEST RESULTS!

A quick reference chart and pictograms will help you select the right blade for your application.

Jig Saw Blades

JT119B0

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	76	50	2	12	100	JT119B0-5

Curve cuts on softwood (2~15mm), plywood, OSB.

JT111C

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	100	75	3	8	100	JT111C-5

Fast coarse cuts on softwood (4~60mm), plywood, OSB.

JT144D

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	100	75	4	6	100	JT144D-5
25	100	75	4	6	10	JT144D-25
100	100	75	4	6	4	JT144D-100

Very fast cuts, straight and coarse, on hard/softwood (5~60mm), plywood, OSB. Plunge cutting.

JT244D

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	100	75	4	6	100	JT244D-5

Fast, curve, coarse cut on soft and hardwood (5~60mm), plywood, OSB. Plunge cutting.

JT244DDC

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	100	75	4	6	100	JT244DDC-5

Fast, curve, coarse cut on soft and hardwood (5~60mm), plywood, OSB. Plunge cutting. Special "DUO" (double) cuts for fast curve cutting.

Jig Saw Blades

JT344D

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	132	110	4	6	100	JT344D-5

Very fast cuts, straight and coarse on thick construction timber, hard/softwood (5~100mm), plywood, OSB.

JT744D

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
3	180	155	4	6	20	JT744D-3

Very fast cuts, straight and coarse on thick construction timber, hard/softwood (5~135mm) and sandwich material.

JT101AO

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	76	50	1,4	20	100	JT101AO-5

Curved cuts, fine finishing on both sides of surface on hard/softwood, plywood, chipboard, MDF, double sided laminates (1,5~15mm).

JT101B

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	100	75	2,5	10	100	JT101B-5
25	100	75	2,5	10	10	JT101B-25

Fine straight cuts with fine finishing on hard/softwood, plywood, OSB and plastics (3~30mm). Plunge cutting.

JT101BR

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	100	75	2,5	10	100	JT101BR-5
25	100	75	2,5	10	10	JT101BR-25

Straight cuts, fine finishing on upper side, hard/softwood, plywood, OSB, laminated panels, plastics (3~30mm). Reverse tooth.

Jig Saw Blades

JT101D

WOOD GROUND & TAPER GROUND TEETH **FINE CUT** **HCS**

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	100	75	4	6	100	JT101D-5

Straight cuts, fine finishing on upper side, on hard/softwood, plywood, OSB, laminates and plastics (7~55mm). Plunge cutting.

JT301CD

WOOD GROUND & TAPER GROUND TEETH **FINE CUT** **HCS**

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	116	90	3	8	100	JT301CD-5

Straight cuts, good finishing, on hard/softwood, plywood, laminates and plastics (7~65mm).

JT234X

WOOD GROUND & TAPER GROUND TEETH **SPLINTER FREE CUT** **HCS**

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	116	90	2-3	8-12	100	JT234X-5

Extra-clean straight cuts, splinter-free finish, on hard/softwood, plywood, OSB, laminates (3~65mm).

JT101BIF

WOOD GROUND & TAPER GROUND TEETH **LONG LIFE** **SPLINTER FREE CUT** **FINE CUT** **BIM 8% Co**

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	83	58	1,7	15	100	JT101BIF-5

Splinter-free cuts. Special for all laminates, HPL and multiplex panels (1,5~15mm).

JT318VF

WOOD&METAL SIDE SET TEETH

EASY CUT **LONG LIFE** **BIM 8% Co**

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	132	100	1,7-2,6	10-15	100	JT318VF-5

Straight cuts on wood with nails/metal, chipboard and laminate (<60mm), sheet metal, aluminium profiles (3~18mm), glass fiber reinforced plastic/epoxy (<60mm).

Jig Saw Blades

JT118A

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	76	50	1,2	21	100	JT118A-5

Straight cuts on thin sheet metals, ferrous and non-ferrous (1~3mm).

JT218A

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	76	50	1,2	21	100	JT218A-5

Curve cuts on thin sheet metals, ferrous and non-ferrous (1~3mm).

JT118B

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	76	50	2	12	100	JT118B-5

Straight cuts on medium-thick metals, ferrous and non-ferrous (2,5~6mm).

JT123X

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	100	75	1,2-2,6	10-21	100	JT123X-5

Straight cuts on thin to thick sheet metals (1,5~10mm), pipes, profiles in plastic and aluminium (<30mm), stainless steel (1,5~3mm).

JT127D

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
5	100	75	3	8	100	JT127D-5

Special for aluminium, thin to thick (3~15mm), pipes and profiles, (<30mm) including plastic, fibreglass and epoxy.

JT718BF

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
3	185	160	1,8	14	20	JT718BF-3

Special for Sandwich Materials & Solid Surfaces (<120mm).

Jig Saw Blades

JT141HM

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
3	100	75	4,3	6	50	JT141HM-3

Plasterboard, fibre cement boards (<50mm). Fibreglass/Epoxy (5~20mm), ETERNIT®, MDF, HDF.

JT341HM

PACK Quantity	L mm	I mm	TS mm	TPI		ORDER NO. T Shank
3	132	110	4,3	6	50	JT341HM-3

Plasterboard, fibre cement boards (<80mm). Fibreglass/Epoxy (5~50mm), ETERNIT®, MDF, HDF.

JT150RF

PACK Quantity	L mm	I mm				ORDER NO. T Shank
3	83	75			50	JT150RF-3

Soft ceramic tiles, cast iron (5-10mm), reinforced fibreglass.

JT313AW

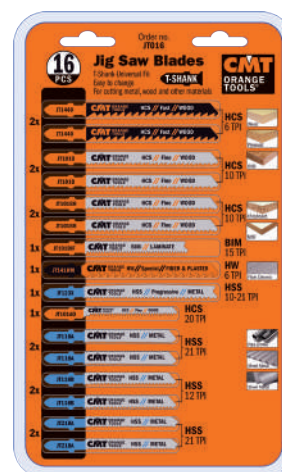

PACK Quantity	L mm	I mm				ORDER NO. T Shank
3	152	100			100	JT313AW-3

Cardboard, polystyrene, carpet, leather, rubber, fibreglass thermal insulation panels (<100mm).

JT016 16 Piece Jig Saw Blade Set

15 Sets in End-cap display (minimum 15 pieces or multiple)

An assortment of 16 Jig Saw Blades featuring the 10 most popular blades for a variety of cutting needs:

- wood and timber (straight, curve cuts, course cutting and finishing);
- plasterboard, fibre cement, fibreglass, epoxy resins, and panels such as ETERNIT®;
- metal and sheet metal both thick and thin;
- stainless steel;
- aluminium and plastics.

GEOMETRY IS IMPORTANT!

**GROUND & TAPER
GROUND TEETH**
Easily cut construction wood,
plywood, framing lumber and
plastic.

MILLED & SIDE SET TEETH
For quick cutting on
hard/softwood, aluminium,
plastic, ferrous
and non-ferrous metal.

MILLED & WAVY SET TEETH
For fine, precise cuts in
thin/thick metal, pipe,
open and closed profiles.

HIGH CARBON STEEL
For cuts on soft wood
or plastic.

BI-METAL WITH 8% COBALT
Provides superb results and guarantees long
life when cutting metals, plastic and wood
with nails.

**TUNGSTEN CARBIDE
TIPPED**
Ideal for construction materials:
fibre cement board,
brick and porous concrete.

QUALITY MATERIALS FOR MAXIMUM PRODUCTIVITY

Produced by following state-of-the-art processes, using high-tech machines and premium quality raw materials, these sabre saw blades have been specifically designed to ensure maximum lifetime and performance in all materials.

THE RIGHT BLADE FOR THE JOB!

Use our quick reference chart and pictograms to help you choose the best blade for your application.

NON-STICK ORANGE SHIELD COATING®

Keeps the blade running cool, reduces pitch build up and protects against corrosion. Ideal for all types of wood including wet lumber.

BLADE LINE DESCRIPTIONS

Different blade lines help you choose the right blade for the task.

- BASIC:** Cost effective
- FLEXIBLE:** Breakproof, long lifetime
- PROGRESSIVE:** Fast cutting through thin and thick material
- TOP:** Fast and efficient
- HEAVY:** Sturdy and precise

12,7mm (1/2") UNIVERSAL SHANK

Fits: AEG®, BLACK & DECKER®, BOSCH®, DEWALT®, FEIN®, FLEX®, HILTI®, MAKITA®, METABO®, MILWAUKEE®, PORTER CABLE®, RIDGID®, ROTHENBERGER®, RYOBI®, SKIL®.

BLADE SHAPE & THICKNESS

Sabre Saw Blades vary in shape and thickness. These two characteristics are adjusted according to the demands of the application as well as the required flexibility. Rigorous applications such as cutting tube and pipe require thick robust blades, while less demanding applications require narrower blades.

Three Main Blade Categories:

1. Universal shape

Universal blades are for general use. Their even width guarantees good cutting stability and excellent control. This enables straight edge cutting through many different materials.

2. Sloped shape

Sloped blades are commonly used for cutting wood and for demolition applications. Their narrow tip allows for plunge and curve cutting. This shape is rarely used for metal, since the tip does not have the strength required for this application.

3. Scroll shape

Scroll blades are especially used for curve cutting. The narrower the blade, the smaller the radius it can cut.

Sabre Saw Blade Application Chart

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	150	130	19	1,25	4,3	6	10	JS644D-5

Cuts construction wood (<100mm), wooden wall panels (<100mm), chipboard, MDF (6~60mm), plywood, plastic (<100mm). Special for plunge cutting.

WOOD **FINE CUT** **HCS**

JS1531L

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	240	220	19	1,50	5	5	10	JS1531L-5

Coarse wood, free of nails (<190mm), pruning green wood (diameter <190mm), firewood (diameter <190mm).

WOOD **FAST CUT** **HCS**

JS2345X

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	200	180	19	1,25	2,4-4	6-10	10	JS2345X-5

Cuts construction wood (<150mm), chipboard, MDF (6~60mm), plywood, plastic (<150mm), wooden wall (<150mm). Effortless fine cutting.

WOOD **FINE CUT** **EASY CUT** **HCS**

Sabre Saw Blades

JS611DF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	150	130	19	1,25	4,3	6	10	JS611DF-5

Cuts wood with nails/embedded metal (<100mm), plastic profiles (<100mm), fibreglass and epoxy (<50mm), wood and metal window frames. Special for plunge cutting.

JS711DF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	150	130	12	1,25	4,3	6	10	JS711DF-5

Cuts wood with nails/embedded metal (<100mm), fibreglass and epoxy (<50mm). Excellent for curved cuts.

JS1111DF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	225	205	19	1,25	4,3	6	10	JS1111DF-5
20	225	205	19	1,25	4,3	6	5	JS1111DF-20

For cutting wood with nails/embedded metal, chipboard (<175mm), plastic profiles (<175mm), fibreglass and epoxy (<50mm).

JS1411DF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	300	280	19	1,25	4,3	6	10	JS1411DF-5

Cuts wood with nails/embedded metal, chipboard (<250mm), fibreglass and epoxy (<60mm).

JS610VF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	150	130	22	1,60	3,2-5	5-8	10	JS610VF-5

Cuts wood with nails/metal, wood, chipboard (<100mm), fibreglass and epoxy (<100mm), wood and metal wall cut-outs, (<100mm). Excellent for rescue/demolition work.

Sabre Saw Blades

JS1110VF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	225	205	22	1,60	3,2-5	5-8	10	JS1110VF-5
20	225	205	22	1,60	3,2-5	5-8	5	JS1110VF-20

For cutting wood with nails/embedded metal, chipboard (<175mm), fibreglass and epoxy, wood and metal wall cut-outs (<175mm). For rescue and demolition work.

JS1210VF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	300	280	22	1,60	3,2-5	5-8	10	JS1210VF-5

Cuts wood with nails/embedded metal, wood, chipboard (<250mm), fibreglass and epoxy (<250mm), wood and metal wall cut-outs (<250mm).

JS3456XF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	200	180	19	1,25	2,1-4,3	6-12	10	JS3456XF-5
20	200	180	19	1,25	2,1-4,3	6-12	5	JS3456XF-20

For cutting wood with nails/embedded metal (<150mm), sheet metal, pipe and aluminium profiles from (3~18mm) in thickness, fibreglass and epoxy (<150mm).

JS5678XF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	225	205	25	1,27	2,1-4,3	6-12	10	JS5678XF-5
20	225	205	25	1,27	2,1-4,3	6-12	5	JS5678XF-20

For cutting wood with nails or metal, chipboard (<175mm), sheet metal, aluminium profiles (3-18mm), glass fibre-reinforced plastic/epoxy (<175mm).

JS725VFR

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank

20	225	205	19	0,90	2,5	10	5	JS1122HF-20

For pallet repair, wood with nails/embedded metal (<175mm), sheet metal, pipe, aluminium profiles (3~12mm). Flexible flush cutting.

JS922VF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	150	130	19	0,90	1,8-2,6	10-14	10	JS922VF-5

Cuts wood with nails/embedded metal (<100mm), sheet metal, pipe and aluminium profiles (3~10mm), fibreglass and epoxy (<100mm).

JS1122VF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	225	205	19	0,90	1,8-2,6	10-14	10	JS1122VF-5

Cuts wood with nails/embedded metal (<175mm), sheet metal, aluminium profiles (3~10mm), fibreglass and epoxy (<175mm). Flexible flush cutting.

JS1222VF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	300	280	19	0,90	1,8-2,6	10-14	10	JS1222VF-5

Cuts wood with nails/embedded metal (<250mm), sheet metal, aluminium profiles (3~10mm), fibreglass and epoxy (<250mm). Flexible flush cutting.

Sabre Saw Blades

JS956XHM

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
3	150	130	24	1,2	3-4	6-8	10	JS956XHM-3

For cutting wood with nails or metal (nails/metal hardness up to 40 HRC), repairing pallets, plasterboard, plastics, glass fibre-reinforced plastic/epoxy, fibre cement (<100mm). For rescue and demolition work.

JS1156XHM

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
3	225	205	24	1,2	3-4	6-8	10	JS1156XHM-3

For cutting wood with nails or metal (nails/metal hardness up to 40 HRC), repairing pallets, plasterboard, plastics, glass fibre-reinforced plastic/epoxy, fibre cement (<175 mm). For rescue and demolition work.

JS955CHM

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
3	150	130	24	1,2	3	8	10	JS955CHM-3

For cutting thick sheet metal (4-12mm), pipes & profiles (<100mm), plastics, glass fibre-reinforced plastic/epoxy, fibre cement (<100mm), wood with nails or metal.

JS1155CHM

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
3	225	205	24	1,2	3	8	10	JS1155CHM-3

For cutting thick sheet metal (4-12mm), pipes & profiles (<175mm), plastics, glass fibre-reinforced plastic/epoxy, fibre cement (<175mm), wood with nails or metal.

JS920CF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	150	130	22	1,60	2,9	9	10	JS920CF-5

Cuts thick sheet metal (4~12mm), thick-walled pipe and profiles (<100mm). Ideal for pipe cutting, for rescue/demolition work. Powerful coarse cutting.

Sabre Saw Blades

JS1120CF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	225	205	22	1,60	2,9	9	10	JS1120CF-5
20	225	205	22	1,60	2,9	9	5	JS1120CF-20

For cutting thick sheet metal (4~12mm), thick-walled pipe and profiles (<175mm). Ideal for pipe cutters, for rescue/demolition work. Powerful coarse cutting.

JS123XF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	150	130	19	0,90	1,8-3,2	8-14	10	JS123XF-5

Cuts thin sheet metal (1~8mm) pipes and profiles (diameter <100mm).

JS925VF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	150	130	19	1,25	1,8-2,6	10-14	10	JS925VF-5

Cuts medium-thick to thick sheet metal (2~10mm), thin and thick-walled pipe and profiles (<100mm). Ideal for demolition work in metal. Fine effortless cutting.

JS1025VF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	200	180	19	1,25	1,8-2,6	10-14	10	JS1025VF-5

Cuts medium-thick to thick sheet metal (2~10mm), thin and thick-walled pipe and profiles (<150mm). Ideal for demolition work on metal. Fine effortless cutting.

JS1125VF

PACK Quantity	L mm	I mm	H mm	K mm	TS mm	TPI		ORDER NO. Universal Shank
5	225	205	19	1,25	1,8-2,6	10-14	10	JS1125VF-5

Cuts medium-thick to thick sheet metal (2~10mm), thin and thick-walled pipe and profiles (<175mm). Ideal for demolition work on metal. Fine effortless cutting.

MAXIMIZE YOUR PERFORMANCE!

HIGH CARBON STEEL
for cutting wood and plastic.

BI-METAL WITH 8% COBALT
for cutting metal, nail embedded wood and plastic.

BI-METAL WITH 8% COBALT WITH TITANIUM COATING
for cutting metal, nail embedded wood and plastic, providing extreme performance and 30% longer lifetime.

TUNGSTEN CARBIDE TIPPED
for cutting wood, screws and nails, fiber cement board, plasterboard, plastic, sheet metal, copper, aluminium and stainless steel. Doubles tool lifetime.

TUNGSTEN CARBIDE GRIT COATED
for routing joints and grooves, smaller cutouts, and routing recesses in a variety of materials: tiles, plasterboard, porous concrete, construction materials, epoxy and fiberglass.

DIAMOND GRIT COATED
for routing joints and grooves, smaller cutouts, and routing recesses in a variety of materials: tiles, plasterboard, porous concrete, construction materials, epoxy and fiberglass. Extreme performance and longer lifetime.

THE RIGHT BLADE FOR THE BEST RESULTS!

Quick reference charts and pictograms help you choose the right blade for your application.

STARLOCK®: THE NEW SYSTEM FOR MULTI-CUTTER POWER TOOLS

STARLOCK® enables extremely reliable and fast accessory changes in a record time of less than 3 seconds. It also guarantees a secure fit and therefore maximum power transfer. The result: up to around 35% faster performance depending on the accessory, noticeably improved precision and reduced noise. To protect the individual tools from overload and damage, the system is divided into 3 performance classes: **STARLOCK®**, **STARLOCKPLUS®** and **STARLOCKMAX®**. The performance potential of a multi-cutter tool can only be fully exploited with the right accessories.

The exceptional quality and service life of our accessories combined with the perfect results delivers excellent value for money.

4 PIECE GENERAL PURPOSE SET FOR MULTI-CUTTERS

**WOOD
WOOD&NAILS**

- 2 blades with Japanese Tothing for all wood products, blockboard, plasterboard and plastics.
- 2 blades in BIM for all wood products, blockboard, plasterboard, fiberglass, epoxy resin and soft plastics. Excellent for cutting wood with embedded nails up to 5mm in diameter and even masonry, like porous concrete.

8 Sets in End-cap display (minimum 8 pieces or multiple)

Cutter Heads for Rabbeting & Profile Knives 40mm

694.020

- These cutter heads have been designed for:
- Rabbeting from either top or bottom.
 - Jointing.
 - Grooving.
 - Profile knives on pages 154~163

For use on spindle moulder machines, moulder, double-end tenoners and edging machines. Suitable for all materials, but best on chipboard, MDF, wood composites, plastic materials and laminates.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 2 universal HWM straight knives 40x12x1,5mm [Z2].
- 2 universal HWM scoring knives 14x14x2mm [V2].
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Supplied in a sturdy plastic carry case

Drawing is 1:1 scale

To use with all 40mm profile knives (refer to pages 154 to 163)

Rabbeting Cutter Heads with Shear Angle

694.100

These cutter heads have been designed for:

- Rabbeting from either top or bottom.
- Jointing.
- Grooving.

For use on spindle moulder machines, double-end tenoner and edging machines.

Suitable for all materials, but best on chipboard, MDF, wood composites, plastic materials and laminates. Improved design with shear angle.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 2 universal HWM straight knives 50x12x1,5mm [Z2], 1 up cut - 1 down cut.
- 4 universal HWM scoring knives 14x14x2mm [V4].
- Tools for manual feed (MAN).
- Pins for automatic positioning of the knives.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Supplied in a sturdy plastic carry case

Adjustable Grooving Cutter Heads Sets (3 pcs.)

694.001

These cutter heads are the ideal tools to create precision slots and grooves 4-15mm in depth.

These sets include:

- 2 cutter heads type **(A)** [Z4 + V4].
- 1 cutter head type **(B)** [Z2].
- 12 spacer rings from 0,1 to 2mm.

For use on spindle moulder machines, moulder, double-end tenoner and edging machines. Perfect grooving on all materials, but ideal on hardwood, plywood and laminated panels.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

TECHNICAL DETAILS:

- Strength steel body.
- 2 HWM Knives 7,65x12x1,5mm [Z2].
- 4 HWM Knives 18x18x1,95mm [Z4].
- 4 HWM Knives 14x14x1,2mm [V4].
- Tools for manual feed (MAN).
- Pins for automatic positioning of the knives.

Supplied in a sturdy plastic carry case

Adjustable Grooving Cutter Heads Sets (2 pcs.)

694.021 - 694.022

These cutter heads are the perfect tools to create precision slots and grooves 14 - 39mm in depth. This set includes:

- 1 cutter head type **(A)** [Z2 + V2]
- 1 cutter head type **(B)** [Z2 + V2]
- set of spacer rings.

For use on spindle moulder machines, moulders, double-end tenoners and edging machines. Perfect grooving on all materials, but ideal on hard wood, plywood and laminated panels.

Supplied in a sturdy plastic carry case

TECHNICAL DETAILS:

- Strength hard aluminium alloy body.
- **694.021:** 8 HWM knives 13,6x13,6x2mm.
- **694.022:** 4 HWM knives 19,5x12x1,5mm.
4 HWM knives 14x14x2mm.
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives.

694.019

These new cutter heads have been designed for planing and jointing soft or solid wood panels on spindle moulder machines. Ideal for routing curved elements with the aid of a bearing guide (sold separately) and a guide fence.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 12 HWM Knives 14x14x2mm [Z2] with 4 spiral indexing.
- Tools for manual feed (MAN).

Supplied in a sturdy plastic twistpack.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Adjustable Rounding & Chamfering Cutter Heads Sets (2 pcs.)

Supplied in a sturdy plastic carry case

694.005

The CMT adjustable rounding and chamfering set consists of two pieces for easy to set up on your spindle moulder machine. Includes five different knives for rounding over top and bottom edges in one single pass with a radius of 2,3,4,5 or 6mm and for 45° chamfering on material 18mm to 50mm in thickness. The improved design with shear angle guarantees perfect finishing!
For use on spindle moulder machines.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- One pair of HWM top knives (A) radius 4mm and 45° chamfer (20x20,5x2mm) [Z2].
- One pair of HWM bottom knives (B) radius 4mm and 45° chamfer (20x20,5x2mm) [Z2].
- 2 HWM knives 50x12x1,5mm.
- Set of 21 spacer rings from 0,1 to 3mm.
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

45° Chamfer Cutter Heads

694.002

CMT chamfer cutter heads carry out clean accurate bevels and joints for excellent edge work. For use on spindle moulder machines, moulder, double-end tenoners, edge banding machines. Suitable for all materials, but ideal on hardwood, plywood and laminated panels.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 2 HMM Knives 50x12x1,5mm [Z2].
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives

Supplied in a sturdy plastic carry case

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Adjustable Chamfer Cutter Heads $\pm 45^\circ$

694.018

This adjustable chamfer cutter head carries out very precise cuts on solid boards. For use on spindle moulding machines, moulder, double-end tenoners and edging machines.

TECHNICAL DETAILS:

- Tool body made from high strength aluminum alloy extremely resistant to tensile and yield stress.
- Manual feed tool (MAN).
- 2 HWM knives 40x12x1,5mm [Z2].
- Adjustable swivelling blades.
- Range: $\pm 45^\circ$ (Rotates at $7,5^\circ$ intervals; Precision= $7,5^\circ$).

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Multiradius Roundover Cutter Heads

694.003

Innovative cutter heads featuring three different knives for making six radius roundover profiles. Standard cutter heads are sold with knives featuring 5 and 10mm radii; two more knife sets are available for making 4-8mm and 3-6mm radii. For use on spindle moulder machines, moulder machines and shaping machines. Suitable for all materials, but ideal on hard wood and panels.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 2 HWM knives radius 5/10mm (25x24,8x2mm) [Z2].
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

694.007

These cutter heads are perfect for making furniture, doors and drawer fronts simply and stylishly by applying a final touch with a CMT cove bit. It is also used for making perfect roundover profiles, drop leaf counters and table tops. You can use three different knives for carrying out roundover and cove profiles with 10, 12 and 15mm radii. For use on spindle moulder machines, moulder and shaping machines. Suitable for all materials, but ideal on solid wood and panel materials.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 2 HWM knives radius 10mm (34,8x29,3x2mm) [Z2].
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives.

Supplied in a sturdy plastic carry case

694.008

The CMT professional finger joint cutter head makes the strongest side-to-side joints on all wood types and composites. The tightness of the joint and the maximum surface area for glue application ensure that the joint itself is stronger than an unworked piece of wood. Maximum thickness 47mm.

For use on spindle moulder machines. Perfect for moulding and furniture specialists. Suitable for all materials, but ideal on hard wood and wood panels.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 2 HWM knives 49,6x11,9x1,5mm [Z2].
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives.

Supplied in a sturdy plastic carry case

694.009

One of the unique characteristics of this CMT cutter head is its capacity to craft indestructible glue joints both quickly and accurately. Ideal for shaping panels, doors and furniture pieces of wide proportion. Simply run one side of the panel, turn the panel over, and then run the opposite side. The result? Perfectly harmonized reverse cuts which match up to produce a flawless joint. Excellent for most materials, but ideal on hard wood, and wood panels.

For spindle moulder machines and double-end tenoners.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 2 HWM knives 40x18x2mm [Z2].
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives.

Supplied in a sturdy plastic carry case

CMT's lock miter cutter heads are ideal for milling miter joints in stock a maximum of 28mm. in thickness. Create boxes, stretcher bars, frames and any assortment of right angle (90°) or parallel joint projects. Two easy steps to produce perfect fitting 45° miter joints: first, position and mill your workpiece horizontally, then vertically.

Create parallel glue joints in two steps: position and mill your workpiece horizontally, internal side facing down, and then turn it facing up. For use on spindle moulder machines and shaper machines. Perfect on all materials, but ideal on solid wood and panels.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 2 HWM knives 43x23x2mm [Z2].
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

We offer a traditional approach to panel construction with these CMT raised panel cutter heads. Engineered using the most sophisticated technology, it represents a key element in the artisans' workshop. Create classic raised panels on furniture, interior and cabinet doors on solid wood and wooden boards, and achieve three different profiles by adjusting the cutting depth. We recommend multiple passes for safe and accurate finishing.

For use on spindle moulders, moulders, and double-end tenoners. Perfect for all materials, but ideal on hard wood and panels.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 2 HWM Knives type (A) 19,8x11,9x1,5mm [Z2].
- 2 HWM Knives type (B) 60x11,9x1,5mm [Z2].
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives.

These versatile sets were designed to make furniture and doors on soft and hardwood. It allows the insertion of five different knives to produce the most popular and classical profiles. The adjustable cutter, included in the set, can also be used individually to carry out grooves between 8-15mm. For use on spindle moulders and moulder machines. Perfect on hard wood and panels maximum 22-25mm. in thickness.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress for cutter heads **(1 & 2)**.
- Strength steel body for cutter head **(3)**.
- 2 HWM knives type **(A1)** 25x29,8x2mm [Z2].
- 2 HWM knives type **(A2)** 25x29,8x2mm [Z2].
- 4 HWM knives 7,65x12x1,5mm [Z4].
- 4 HWM knives 14x14x2m for heads type **(1 & 2)**.
- 12 spacer rings from 0,1 to 3mm for heads type **(1 & 2)**.
- 12 spacer rings from 0,1 to 2mm for heads type **(3)**.
- Tools for manual feed (MAN).

Rail & Stile Cutter Heads

694.014

These are unique products made by combining two cutter heads, ideal for making furniture doors and drawers. By adjusting the height of the of the cutter head, you can cut two perfectly fitted profiles without wasting time or effort on the fence or replacing the tool. Improve your efficiency and save money only having to purchase one single cutter head!!! For use on spindle moulders. Perfect on hardwood and panels between 22mm-25mm. in thickness.

TECHNICAL DETAILS:

- Hard aluminium alloy body with high resistance to tensile and yield stress.
- 2 HWM knives type (A) 40x24,5x2mm [Z2].
- Tools for manual feed (MAN).
- Pins for the automatic positioning of the knives.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Supplied in a sturdy plastic carry case

TECHNICAL DETAILS:

HPS® is a material specially formulated using special heat treatments developed for the woodworking industry by Thyssen-Krupp. This steel is enhanced with the following special attributes:

- superb wear resistance
- maximum level of toughness
- resistance to softening
- easy to profile - tested for long life

Test results on Oak: - Spindle speed=6000 rpm,
- Feed speed=24 meter/min
= Result HPS® 17500 meters.
= Result HSS 10000 meters.

TECHNICAL DETAILS:

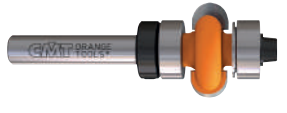

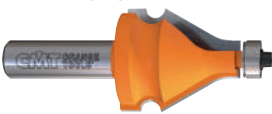

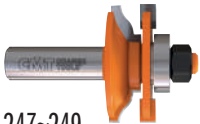

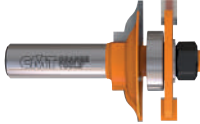

K1920 Hardness (HV10): 1.920 - Transverse rupture strength (N/mm²): 2.600
New chrome grade for universal cutting applications. Excellent resistance to corrosion, oxidation and mechanical wear. High efficiency, 20% longer lifetime compared to standard grade.

K2250 Hardness (HV10): 2.250 - Transverse rupture strength (N/mm²): 2.400
New nano-grain grade for maximum wear resistance. Higher efficiency due to improved tool lifetime. Improved toughness.

All knives are supplied in a 10 pc. case.
Minimum 10 piece or multiple of 10 piece order.

DECREASE

WHAT'S THE SECRET TO FLAWLESS EDGE PROFILES WITH NO REWORK?

WOOD MAGAZINE **Best Overall**
WOOD'S CHOICE 1994
ROUTER BITS

CMT Overall Rating 10!
Top Performing Router Bits

**MULTI-AXIS GRINDING
 CREATES A 3X LONGER
 LASTING MIRROR FINISH**

Each cutting edge is precisely sharpened to the micron, in order to produce a cutting angle, which is razor sharp, yet extremely durable.

ANTI-KICKBACK DESIGN

Controls depth of cut and minimizes the chance of kickback, reducing your risk of injury.

**SINTERHIP
 HI-DENSITY
 INDUSTRIAL CHROME
 CARBIDE**

New process called SinterHIP (Hot Isostatic Pressing), helps prevent material failure and increases cutting life.

TRI-METAL BRAZING

Our Silver-Copper-Silver brazing protects the carbide tip when cutting harder wood or wood composites and reduces the chance of failed welds.

**NON-STICK
 ORANGE SHIELD
 COATING®**

Prevents bit from heating up, reduces pitch build-up, protects against corrosion and provides a longer bit life.

DELUXE PACKAGING

**SUPERIOR
 HIGH-STRENGTH STEEL**

We use high-quality, solid bar stock sourced from Switzerland, which provides exceptional resistance to fatigue and abrasion.

BUILDING THE WORLD'S FINEST CUTTING TOOLS

We built our foundations and reputation for high quality tools on the craftsman-like manufacturing of boring bits and router bits. Times have changed and current technology has completely altered the industry. As a result, our facilities have been newly renovated and our equipment today represents the most advanced technology available on the market. This allows us to continue to manufacture cutting tools with the skill and care that we always have.

DESIGN

We engineer all of our products with a purpose in mind. Years of developing high performance cutting tools means that our top-sellers are tried and true, the result of continued perfection of each design, but we don't stop there: new materials, new profiles and new methods continue to emerge everyday.

At CMT, our objective is to remain on the cutting edge of innovation so our technical department ensures to continually monitor market developments, incorporate state-of-the-art software and apply experience in the sector to designs tools that are worthy of the CMT brand.

MATERIALS

Essentially, the main components of a router bit are just two: steel and carbide. If either of these is less than the best, the tool we make will show it.

We've researched steel and carbide since the beginning, and found exactly what we were looking for:

Superior Steel. Our steel is comes from right above the border in Switzerland where an exclusive hot drawing process is applied to forge the solid bar stock we use to manufacture our shanks and bodies.

The result? Steel that is superior in strength and exceptionally resistant to fatigue and abrasion.

High-Grade Tungsten Carbide. If steel is what gives our tools strength, carbide is what gives them intelligence. The capacity of the carbide tip to cut precisely and to last a long time is critical for the performance of any tool, so at CMT we use only premium micrograin carbide from Luxembourg to make the tips for our router bits.

MANUFACTURING

Turning, Milling and Cutting. Our biggest investment in recent years has been in upgrading production. Today, all machinery at CMT is fully automated. CNC machines run by specially trained operators who make sure that the shanks and bodies of our router bits and boring bits are accurate and perfectly balanced.

Heat Forged Steel Bodies for Large Diameter Bits. No router bits are exactly the same, sometimes not even in the way they are made. Certain bits require a few more steps than others, like heat forging the steel of larger diameter bits before turning it down into precise bit bodies. This extra step produces a radial grain orientation which gives large diameter bits extra strength and durability.

Brazing. We have pioneered the art of brazing. Not only does our unique custom-designed computerized brazing equipment help eliminate the inconsistencies found in old fashioned hand brazing, but our silver-copper-silver brazing 'sandwich' provides a tight bond between the steel and the carbide, with a shock absorbing effect to protect the carbide tips when cutting harder woods.

Specially Formulated Carbide for Specific Applications. You have to cut every kind material, so we make sure that our carbide tips can handle each individual job. This means specially formulating the carbide of each tool so that the compositions vary from being super hard (for tough cutting jobs like laminates) to being

less hard (to absorb the impact when cutting large profiles) and everything in between.

Grinding and Sharpening. The final step in the production process is no different from the rest: sharpening and grinding are done to extreme precision on multi-axis CNC machines. Each bevel and angle is ground or sharpened to the micron, to produce a cutting edge that is both razor sharp yet extremely durable.

680°C in seconds - and the brazing is complete.

QUALITY CONTROL

Even the simplest of tasks can include a margin for error. However at CMT, we take measures to prevent this. We always manually check the quality of our tools at each step of the manufacturing process, and we still make test cuts with rail & stile bits to make sure the cut fits. However, now we also use a fully automatic measuring process that evaluates every part of the tool without actually coming into contact with it, to make sure that the tool dimensions are accurate and that the profiles conform precisely to technical specification. We also use this system to gauge the wear and tear on the CNC machines.

CMT's fully automatic measuring system.

Solid Carbide Spiral Bits - LONG LIFE

Thanks to the spiral cutting edge which stays in continuous contact with the workpiece, these bits provide smoother, chatter-free cutting action, unlike conventional bits which have intermittent contact with the workpiece. Unsurpassed performance and cleaner cuts in ordinary or difficult materials, softwood, hardwood, plywood, composites etc. This new range of spiral bits with 6 - 8 - 12mm and 6,35 - 12,7mm shanks allow them to be used with a CNC router and hand-held routers. **Excellent quality-price ratio!**

192.41 DLCS Chrome Coating (See page 295)

174 - 177 - 912

These industrial straight bits are made from stainless steel specifically created to withstand rigorous workloads on hand-held or CNC routers. The two lateral cutting edges allow you to execute any kind of plunge drilling and trimming jobs on solid, soft or hardwood, wood composite and plastic or laminated materials.

APPLICATION: - soft and hardwood and wood composite
- chipboard, MDF (laminated & melamine)
- plywood, veneer, ecc.

PLUNGE CENTRE TIP Z2+1

The special carbide-tipped cutting edge guarantees long-lasting performance compared to traditional bits.

Straight Bits, Long Series

7/8/912

SAFETY PRECAUTIONS: never use damaged or worn bits. Always work at the recommended proper feed rate without forcing the bit. Pay particular attention when making the initial cut with a small diameter bit. For best results when working with small diameter bits, make the cut in more than one pass.

The sharpened cutting edge is perfect for short plunging operations

Straight Bits

HWM HW Z1 Z2 RH

7/8/911

If you are looking to get the most out of your time and money through more efficient production, but want nothing This double edged cutter is made of special FATIGUE-PROOF® steel and micrograin carbide to withstand even the heaviest of workloads. The surface is protected with our trademark orange non-stick P.T.F.E. coating to help keep the bit from collecting resin, pitch and other residue.

Every bit is subject to strict quality tests to guarantee perfect cutting tolerance, balance and concentricity. You can also count on exceptional swarf removal to allow cleaner and more constant cutting. CMT bits are perfect for industrial scale production using a variety of materials such as plywood, composites and natural woods.

The sharpened cutting edge is perfect for short plunging operations.

Plywood Groove Set

HWM HW Z2 RH

811

These groove bits are specifically designed to rout grooves and dados for joints in plywood. This means they match the true thickness of the material, producing tight, accurate joints. Use our 18.2mm bit for 19mm plywood, 12.3mm bit for 12.7mm plywood and our 6mm bit for 6.35mm plywood. No sloppy joints. No worries! These money-saving 3-bit sets are available with 12.7mm or 6.35mm shanks.

EXAMPLE SHOWN IN 12,7MM THICK PLYWOOD

This joint is made with the CMT 12,3mm straight bit for 12,7mm plywood. Notice the precise fit - no gaps.

This joint is made with a regular 12,7mm straight bit for 12,7mm plywood. Notice the extra space and poor joint fit.

* Z1

170 - 171 - 180 - 181

TECHNICAL DETAILS:

- Strength steel.
- 2 HW alternating precision ground cutting edges [Z2+1].

APPLICATION: ideal for groovework in solid wood, wood composites and laminates. Can be used on machining centres, CNC routers and hand-held routers equipped with chucks or adaptors.

Drawing is 1:1 scale

TECHNICAL DETAILS:

- Premium quality HWM.
- 2 spiral cutting edges [Z2].
- Extra-fine finish.
- Upward chip ejection.

APPLICATION: used for plunging, routing and trimming on plastic and aluminum at high feed speed. Can be used on machining centers, point to point machines, CNC routers and hand held routers equipped with chucks

Straight Router Bits with Insert Knives

651 - 652

Straight router bit with one replaceable mini knife and fixing wedge. Radial and axial groove for better and safe knife insertion. For finishing, routing and grooving in board materials (DTD laminated, MDF and hardwood). For use on portable routers or CNC machining centres.

Drawing is 1:1 scale

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Straight Router Bits with Insert Knives for Laminates

652

Straight trimmer bits with one replaceable knife fixed by a TORX® screw. A smart economical solution best suited for specialized applications requiring low downtime. The 29.5x9x1.5mm knives provide a 40mm cutting length by making multiple passes. For routing trimming and grooving on board materials (laminated chipboard, worktop panels and MDF). For use on portable routers.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Mortising Bits

7/8/901B

Perfectly mortised hinges are the sign of a true artisan. These bits equipped with thick Tungsten carbide tips and negative shear angle design, guarantee flawless performance. Mortise perfect hinges with no splintered edges or rough bottoms. Mortising is a breeze on both natural wood and wood composites. Compatible with most mortising jigs. Complete with a top bearing guide, these bits are the perfect tool for sign making and template work.

The CMT mortising bit is an essential tool for traditional hinge installation.

Hinge Recesser Bits

7/902

CMT hinge recesser bits are ideal for shallow lateral routing cuts such as recessing hinges.

SHOP TIPS: corners will require final square with a hand or a corner chisel.

Drawing is 1:1 scale

IDEAL FOR HINGE RECESSING

The special design allows for optimal chip clearance and plunging.

Dado & Planer Bits

852B

This bit is perfect for smoothing baseboard and rough surfaces. Tungsten carbide tips and downward shear angle provide exceptional performance and quality. This bit can be used to remove paint and enamel residues. Also available with bearing for projects requiring high precision.

7/8/911B

These double-fluted bits paired with the template of your choice will produce distinctive cabinets, furniture pieces, signs, toys and personalize a variety of creative projects.

SAFETY TIPS: make sure your router is in top condition. The template must be securely fastened to the workpiece. When choosing a bit, carefully consider the thickness of the template and all the implications of the cut. Opt for the shortest bit possible for the project you are working on.

Pattern Router Bits with Insert Knives

INSERT CARBIDE Z1 Z2 RH  2X CUTTING

652B

Straight router bits with a replaceable knife fixed by a TORX® screw. An economical solution for specialized applications requiring low downtime. Cut up to 40mm in depth by carrying out several passes. Equipped with top bearing for template use. For routing, trimming and grooving in board materials (laminated chipboards, MDF) and hardwood. For use on portable routers.

CORRECT KNIFE POSITIONING

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Weatherseal Bits

HWM Z2 RH

Make your house more energy efficient by insulating old doors and windows. The CMT Weatherseal bit is the perfect bit to re-groove door and window frames to accommodate wind blocking inserts. Made of solid tungsten carbide for strength and endurance, these bits reach up to 12mm in depth without the risk of breakage.

Special double-sided design lets you save money by offering two tips in one bit; with the same features as the one-sided weatherseal bit. Only available with a 3mm (1/8") cutting diameter.

Combination Trimmer Bits

HW Z2 α RH

7/8/921

Work to your highest standards with the CMT combination trimmer bits. Now you can cut, trim and bevel all laminates without having to change the bit. Achieve great results when making straight or angled cuts on both soft and hardwood. Three popular sizes, each with carbide-tipped cutting edges for efficient bevel and straight trimming.

NOTICE: to be used with an edge, separate guide or fence.

Combination Trimmer Bits

7/907 - 7/8/909 - 7/910

CMT's combination flush and bevel trim bits are perfect for executing a variety of superb precision finishing on laminates with ease without even changing the bit. Simply lower the bit cutting depth for precise right angle cuts or raise to 25° to create rounded edges. Suitable for both soft and hardwood. They feature two flutes for executing smoother cuts and for rounding off table legs and other soft areas on furniture susceptible to damage.

SHOP TIPS: after resharpening, replace bearing 791.002.11 (Ø9,5mm) with undersized bearing 791.062.00 (Ø9,3mm)

Flush Trim Bits

7/8/906

These truly indispensable bits were designed in a wide range of sizes for your woodworking needs as well as your most difficult projects. For precision work on laminates or quick template work with excellent finishing.

SHOP TIPS: these bits are excellent for making clean through-mortises. Use a straight bit Ø13mm (711.130.11) to produce a 5mm groove in the area you want to produce the through-mortise. With a drill bit Ø13mm (517.130.31) bore a hole through the wood at one end of the groove. Turn the workpiece over to finish the mortise. Use a flush trim bit Ø12mm with a cutting length slightly longer than the fillet, following the groove made on the opposite side of the workpiece with the ball bearing guide.

SAFETY TIPS: dust and chips from laminate materials are hazardous to your health and safety. Always wear a dust mask and eye protection when routing.

8/906.227.11

 791.003.00 (Ø12,7mm) with undersized bearing 791.063.00 (Ø12,5mm)

Flush Trim Bit Set

806

Indispensable in any shop, the new 3 piece flush trim bit set gives you the option to trim laminates or do template work conveniently using just one instrument.

- Set contains:
 806.095.11 (Ø9,5x25,4mm)
 806.096.11 (Ø9,5x12,7mm)
 806.191.11 (Ø19x25,4mm)

DESCRIPTION		ORDER NO. S=Ø6,35mm
Flush Trim Bit Set	5	806.001.11

Super-duty Flush Trim Bit - XTREME Series

8/906B XTREME

These new **XTREME** flush trim bits guarantee the best possible finish along with extra-long life thanks to one-of-a-kind spiral technology. 4 cutting edges in high quality carbide are crafted using special brazing techniques as well as unique positive and negative design thus eliminating splintering on the upper and lower sides of the material you're working with. Ideal for projects involving precious wood, melamine and delicate engineered veneers.

NOTA: use of variable speed routing machines is required.
19mm bits Max RPM 18.000
35mm bits Max RPM 16.000

Double-Bearing Spiral Flush Trim Bits

190B - 191B - 192B

CMT solid carbide spiral flush trim bits are composed of a special super-micrograin formulation increasing hardness with a higher transverse rupture point. Combined with a spiral cutting angle, CMT solid carbide spiral flush trim bits equipped with a double bearing, allow cabinet makers to shear wood and wood products cleanly, providing more efficient chip ejection than standard flush trim bits. In production settings, this means these bits will run cooler, stay sharper, last longer and increase shop productivity.

3-in-1 Flush Trim Bits for MDF/Laminate

7/8/907

3 in 1 new flush trim bits with DELRIN® Triangular bearings are your best partner for laminate trimming. In fact, it solves three of the most common problems that occur when flush trimming:

- 1) The anti-stick properties of the DELRIN® bearing greatly reduces the likelihood of freezing of the bearing from glue.
- 2) The extended guide surface of the new DELRIN® bearing will perfectly match the work surface without scratching like a steel bearing would. The DELRIN® bearing also guarantees maximum stability.
- 3) The shear angle cutting edge reduces the need for filing. 3-in-1 bits are ideal on plastic laminates as well as aluminium laminates!

3-in-1 bits are ideal on plastic laminates as well as aluminium laminates!

Drawing is 1:1 scale

Patent No. D628,218

- Extended guide surface
- Non-freezing
- Non-scratch surface

PERFECT TRIMMING WITH CONICAL EDGES!

Thanks to the innovative conical edges of this bit, you will always get perfect cuts even after re-sharpening. In fact, the most common problem you have with standard flush trim bits is the undersized diameter after re-sharpening which leaves a mark on the material; with the new CMT construction you could re-sharpen up to six times without any problem. Just remember to adjust your bit up or down as per the illustration.

657.9

Specially designed to perform difficult trimming operations, these bits are both indispensable and economical. Flush trim bits with two replaceable knives fixed by special TORX® screws. The 2-sided blades can create extra new edges. Guided flush trim bits type **657.1** are equipped with ball bearing guides.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

CORRECT KNIFE POSITIONING

Press the knife against the seat and then tighten the screws.

Pattern/Flush Trim Bits with Insert Knives

657B

These bits complete the wide range of CMT Flush Trim bits equipped with a bearing. A larger 19mm diameter and double bearing distinguishes this bit from the others given its increased stability throughout flush and trimming operations. This means completing difficult projects safely, especially when you require a significant amount of swarf removal and an optimal precision finish.

CORRECT KNIFE POSITIONING

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Flush Trim Router Bits with Double Bearing

806/906B

The innovative two-flute router bits are equipped with a double bearing and feature a down shear design allowing cleaner, smoother cuts on a variety of materials.

Now its no longer necessary to flip or move your tool during routing operations. This tool is particularly effective when routing curved elements along or against the grain.

7/8/916

How much time do you end up spending making openings in paneling, drywall, siding, doors or windows? With the CMT panel pilot bit, the job just got quicker. The point of this bit as well as the **716.061**, plunge smoothly and easily and the carbide edges cut clean and fast. All of this adds up to accurate cuts in less time and with less effort - great for trimming veneer as well as a variety of laminates.

SAFETY TIPS: always use extra caution when working near electrical outlets and boxes - always shut off the power. Make sure the bit does not go so deep as to touch or cut the wires.

Panel Pilot Bits with Guide

7/8/953

An absolutely indispensable bit for making cabinets. CMT Flush and V-Groove bits allow you to make cabinet front frames in 25mm stock that fit perfectly with the sides. The added V-cutter feature makes a decorative groove along the hinge joint to hide the seam.

SHOP TIPS: For best results, leave less than 3mm overhang on cabinet front frames for easier routing.

The CMT Grand Rabbet Set

8/935.503

"The Grand Rabbet" by CMT is an investment that shows your commitment to quality. This CMT product will deliver years of reliable service under normal use. For safe and trouble-free results please observe the following instructions and safety precautions. The complete kit (item code **835-935.503.11**), will enable you to produce 17 different rabbet sizes including rabbets for under-sized plywood applications. For rabbet sizes over 12,7mm (1/2"), make the cuts in several shallow passes until the desired depth is achieved.

Available in 12mm and 12,7mm shanks.

Rabbeting Bits

7/8/935

CMT carbide-faced rabbeting bits are fast and accurate - you can quickly produce inset doors and drawer fronts, make strong rabbet joints, mill perfect tongue and groove joints or any number of other jobs usually time consuming and difficult. Other possibilities for these tungsten carbide bits are illustrated below and on the following pages.

Rabbeting Sets

7/8/935.001_501

HW **Z2 RH**

CMT rabbeting sets include one rabbeting bit, 6 interchangeable ball bearing guides, fastening screws, shields and an hex key. In order to change cutting depth, substitute the bearing.

791.703.00 Standard

BE SURE to keep the black bearing washer right side up to correspond with the bearing rotation when re-assembling the bearing. Improper re-assembly can cause the screw to come loose.

Keyhole Bits

7/8/950.0_5

With the CMT keyhole bit you can make holes that keep your frames, plaques or any wall hanging perfectly straight and attached to the wall. The perfect way to securely mount wall hangings on screws and nails. Three new bits available to create slots for M5, M6, M8, M10, M12 hexagonal head bolt for removable joints.

SAFETY TIPS: Be sure the workpiece is securely fastened to the router table or work bench.

SHOP TIPS: Recommended for use with a plunge router.

Screw Slot Bits

HW Z2 RH

8/913

Any large panel or table top should be secured in a way that allows it to expand or contract without splitting. These screw-slot bits let you create screw slots so that panels can be held in place but are able to slide back and forth without splitting the wood or breaking the screw securing them.

Bits available in 8 and 12,7mm shank; art. **913.201.11** and art. **813.701.11** correspond to countersink screws and art. **913.101.11** and art. **813.601.11** correspond to flat-head screws.

Flooring Router Bits

HW Z2 RH

822.023B - 822.024B

CMT now offers you these industrial quality carbide-tipped router bits for flooring and inlay applications. They easily and smoothly run through solid and timber wood while cutting edges and remain sharp even after several passes **822.024.11B** item number also features rounded edges to produce 3,2mm (1/8") radius inlays. These bits are equipped with a stop collar and a bearing.

3-Wing Slot Cutter

8/900.506

Create slots, grooves and rabbets in materials from 3,2mm to 18mm in depth by using the adjustable CMT 3-Wing slot cutter set. See chart below for details on spacing and correct cutter combinations. Ideal for biscuit joints and milling perfect tongue and groove joints. This set includes:

- 4 carbide tipped cutters 3,2mm, 4mm, 4,8mm, 6,4mm
- 1 arbor 12mm or 12,7mm
- 1 ball bearing (22mm) for 12,7mm cut
- 17 shims: (8x0,1mm - 4x0,5mm - 3x1mm and 2x4mm)

SAFETY TIPS: never use the slot cutter set without shims between the cutters. The distance between the cutters can vary from 1mm to 1,7mm. A shim must also be positioned between the ball bearing and the cutters.

SHOP TIPS: the bearings kit **791.711.00** makes 6,35mm and 9,5mm cutting depths.

NOTE: the carbide edges of the cutters must never touch; arrange the shims as illustrated below. Use only thicknesses provided in the set. Be sure all cutters are assembled in the correct rotational direction. Looking downwards on the arbor, the cutters will turn clockwise.

CUTTER COMBINATIONS	CUTTER HEIGHT

Tongue & Groove Set

8/900.626

Make tongue and groove joints without the complicated process of taking apart and reassembling bits. The new CMT tongue and groove set gives you one bit to groove the slot and a separate bit to mill the tongue. Or use your imagination and put them to work individually on other projects. Makes tongue and groove cuts in wood up to 19mm thickness.

7/8/922A/B

Uses for the CMT 3-Wing Slot Cutter are almost infinite. Cut slots and grooves for splines, biscuits, T-molding or tongue and groove joints.

Every cutter features 3 tungsten carbide tipped cutting edges, CMT's trademark orange non-stick P.T.F.E. coating and boasts an anti-kickback design. CMT slot cutters are available as a blade only or with your choice of a 6, 8, 12, 6,35 or 12,7mm diameter arbor which includes a 22mm diameter bearing for a cutting depth of up to 12,7mm. Other bearings are available in the spare parts section of this catalogue.

NOTE: For 9,5mm or 6,35mm depths, you can order the bearing kit **791.711.00** (with 28,5mm - 34,9mm diameters).

Flute & Bead Set

8/955.701

This perfectly mated CMT set is ideal for making wooden canoe slats and hot tub enclosures. The cutting edges in tungsten carbide stay sharp even after cutting large amounts of stock. The anti-kickback design ensures that you work safely. Use both the flute and the bead bits for 6,35mm (1/4") slats as shown below.

Lock Miter Set

8/955

Use this pair of bits to produce octagonal shaped boxes and popular corner cabinetry for kitchens, kitchen islands, entertainment centres and corner hutches.

This 22.5° Lock Miter set provides a strong tight joint even at 45° angles.

After the joints are machined, they can be glued and assembled or simply clamped by using strapping tape.

Drawing is 1:1 scale

8/955.504

These are the ultimate bits to craft sturdy miter joints thanks to anti-kickback design and tough tungsten carbide cutting edges. By adding a second smaller bit, you can mill anywhere from 9,5mm to 28,5mm in thickness. A quick and easy way to accurately create boxes, stretcher bars, frames and any assortment of right angle or parallel joint projects.

You also have the advantage of using the same bit for parallel joinery projects. To mill sturdy parallel glue joints follow step 1 shown in the illustration with the inside face of the workpiece laid flat on the table and centred to the bit. To make the second part, lay the workpiece flat on the table and centred to the bit. Mill with the inside face-up.

8/955.503

Drawing is 1:1 scale

FOR MITER AND PARALLEL GLUE JOINTS USING 19MM BOARD

Nr. 1: Rout one piece with the inside face flat on the router table. Be sure the cut is centred to the stock.

Nr. 2: Rout the second piece with the inside face vertical to the fence.

Reverse Glue Joint Bits

8/955.501

The most unique and important characteristic of this CMT bit is its capacity to produce a virtually indestructible glue joint quickly and flawlessly. Ideal for routing panels, doors and furniture pieces of wide dimension, panels, doors and furniture pieces. Refer to page 248, "ABCs of Panel Door Construction".

By accurately centering the bit to the wood, the upper and lower vertical cutting edges of the bit will cut equal proportions. Simply run one edge of the panel, turn the panel over, and then run the opposite edge - you will craft perfectly harmonized reverse cuts that match up to produce immaculate joints!

SHOP TIPS: When glueing, apply enough pressure to securely seal the joint. Insufficient pressure results in a weak joint and excessive pressure will distort the wood.

EXAMPLE USING A 19MM BOARD

Accurately centre the wood to the bit: Adjust the bit according to the thickness of the wood you are cutting. Line up the cut edge of the wood to the centre point of the bit as illustrated in the enlarged drawing. The upper and lower vertical cutting edges of the bit are in proportion and at an equal distance from the centre point of the bit. Run one cut edge of the wood, turn the piece over and run the other edge for exact reverse cuts that match up perfectly. Assemble the reverse cut pairs together for beautiful, strong joints.

Drawer Lock Bits

7/8/955

With CMT drawer lock bits you can make strong, perfectly fitted joints quickly and easily. Follow the example below to create perfect drawers.

WARNING! These bits are to be used on router tables only with a fence. Do not use on hand-held routers.

STEP-BY-STEP WINDOW SASH CONSTRUCTION

CMT set makes it easy!

In our step-by-step example for window sash construction, we used the following:

- CMT Window Sash Set (item #855.801.11)
- stiles cut 35mm thick
- rails cut 35mm thick
- scrap stock

The CMT Window Sash Set was designed ideally for the construction of windows in 35mm stock, however variations as narrow as 28mm can be used. Stock thicker than 35mm exceeds the milling range of the cutter. Remember to adjust your measurements and cutting depths according to the wood thickness you use. We suggest making a trial joint in scrap stock according to the following steps before milling all of the cope and stick Profiles.

STEP 1 - Measurements and making the tenons

The ideal thickness of the stiles when using the CMT sash set is 35mm. The desired width of the stiles will determine the length you need to make your tenons, while the length of the stile will represent the desired full height of the sash. When cutting the rails to length, make sure to add the length of the two tenons to the overall length of the rail. The length of the tenons should be at least half the width of the stile. Mill 16mm measuring from the front face of the stock using a table saw, radial saw or router as shown in illustration 1. This measurement remains invariable since it is calculated to the height of the CMT sash routers. The width of the tenon is 6mm. Rotate the stock and mill the other side. As per our example, the second milling will be 13mm but this measurement will vary if you are using thinner stock.

STEP 2 - Making the cope Profilee on rails, sash bar and muntins

To make the cope Profilee, place the rail face front down on the router table with the tenon flush to the bit as shown in illustration 2. Adjust the fence so the bit mills 6,35mm deeper than the tenon. To mill the sash bar and the muntins (cross bars), position front face down on the router table and mill without changing the height of the bit.

STEP 3 - Making the stick Profilee on rails, stile, sash bar and muntins

To mill the stick Profilee along the inside edges of all sash parts, place the already milled cope Profilee front face down on the router table and adjust the sash bit so that the lower edge of the top cutter will exactly touch the upper edge of the tenon as shown in need to 3 illustrations. With the rail still face down on the table, turn it so the inside edge of the rail is touching the bit and mill the stick Profilee. Mill the inside edges of the stiles and mill both edges of the front face of the sash bar and muntins. To cut the slots for the tenons, measure 16mm from the front face of the stiles and rout with a table saw.

Ovolo Sash Bits

8/955.3

These bits allow you to make true divided light doors for fine furniture and cabinets as well as sash bar windows, and stile and rail constructions. The glazing bar ovolo bits are bearing-guided to enable curved frames to be moulded. Cove bits can be used to produce easy-to-pull drawer handles.

Finger Joint Bit

8/900.616

This router allows you to carry out accurate and functional finger joints with the greatest of ease. Without any adjustment you will be able to work woods with different thicknesses as indicated in the drawing. The bearing allows you to reach a 9,5mm cutting depth. For further cutting depths you need to use a fence.

Professional Finger Joint Bit

8/900.606

This versatile finger joint bit is the perfect tool for making incredibly strong side-to-side or end-to-end joints in wood and in varying lengths from 12.7mm to 36mm. The tightness and accuracy of the cut joint coupled with the maximum glue surface create a joint that is actually stronger than an unworked piece of wood.

V-Tongue & Groove Set

8/955.506

If the standard selection of moulding and mill work you find in today's lumber shops isn't satisfactory to your woodworking tastes, then consider CMT's moulding system instead. With these bits, you can make dozens of elaborate profiles by combining two or more passes. Avoid the average and create your own mouldings. Some initial suggestions are illustrated below.

SAFETY TIPS: use these bits with a fence. The profiles shown below are milled from heavy stock then refined to the desired shape.

Edge Banding Bits Set

8/955.510

This is a great set to create cost-effective, yet attractive durable edges to your cabinet doors. For use with 12,7mm or 25,4mm thick panels in plywood or MDF. Easy to use: center each cutter on the stock and make the cut; glue the two pieces together; flush trim after assembly, if necessary. The set features a 60° angle tongue & groove with an ample surface area for glue application.

Dovetail Bits

7/8/918 - 7/818B

The beautifully crafted dovetail joint is a classic that appeals to both professionals and novices alike.

SHOP TIPS: Two passes are recommended when routing dovetails with a template. Check that the dovetails have been cut through completely and smoothly before removing the workpiece. For even easier routing and less stress on your dovetail bit, run the first pass with a straight bit. Use a dovetail on your router table equipped with a fence to achieve difficult chamfer angles.

SAFETY TIPS: If the dovetail bit jams while working, adjust the position of the bit in the collet and ensure the cutting depth is appropriate. Do not lift the router out of the template.

60° Lettering Bit

8/949B

The ideal bit for engraving in wood, CMT designed this bit to make attractive signage without running the risk of splitting or chipping. Especially useful for letter carving in relief. A flattened bottom makes relief letter-making easy and accurate. This exclusive design allows you to efficiently level off the area around the base of the letter and bevel the edges to eliminate splintering. Try our 60° angle lettering bit equipped with a top bearing guide to produce even more attractive decorative effects.

Bowl & Tray Bits

7/8/951B

7/8/951

This CMT bit is ideal for making bowls, trays, boxes, cutting boards or any other specialty or craft item. The round corner of the bit shapes the inner radius while the sides and bottom create the smooth flat surfaces. We recommend using a top bearing for accurate and easy pattern work.

TIPS: use these bits on a table router with bearing guide for decorative edgework.

HW Z2 RH

ALUCOBOND® panels are an aluminium composite material that can be shaped using a very simple processing method. This technique referred to as the 'routing and folding' method which means paneling can be manipulated to form a variety of shapes and sizes. The advantages of this unique technique are:

- Low investment cost
- Simple fabrication technique
- Folding can be done on site, saving transportation costs
- Low-cost fabrication of shaped components, wall cladding, roof edgings, column cladding, flashings, etc.
- Flexibility in creating shapes
- Very cost effective
- Shapes are not limited by machine capacity.

Laser Point Bit

7/8/958

HWM HW Z1 Z2 Z3 RH

This bit crafts delicate grooves and incisions with laser precision. Make one-of-a-kind effects with 30° bevel edges in one single run. Equipped with three super sharp cutting edges, this perfectly balanced bit allows you to work with incredible accuracy with no risk of burning. Raise the bit and produce a delicate fine point incision, or work the whole 12,7mm diameter to render bold highlighted lettering. Super strong steel shank and micrograin carbide cutting edges guarantee long lasting performance.

V-Grooving & Signmaking Router Bits with indexable knives (90°)

665

These bits have been designed for signmaking and lettering. When the insert shows signs of wear, you can simply rotate it to exploit the other cutting edges. A locking screw secures the insert tightly for added safety and extreme cutting accuracy.

TECHNICAL DETAILS:

- Strength steel.
- 1 HW precision insert knife [Z1].

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Chamfer Bits with Insert Knives

Chamfer trim bits feature two replaceable knives fixed by special TORX® screws. The knives are sharpened on all sides and can be resharpened up to three times. For slight bevelled edges or decorative edgework in a variety of materials. Equipped with bearing guides with no need for counterprofiles. For use on portable routers.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Chamfer Bits

7/8/936 - 8/957

CMT chamfer bits can cut clean, accurate bevels and chamfers and are great for edge work or for making perfectly aligned multi-sided containers, boxes and other decorative projects. See illustration below for examples. Can be used for working larger scale projects such as beams and columns with excellent results.

Round Nose Bits

Personalize your doors, drawer fronts, panels or any surface with your own signature motif. CMT round nose bits in solid carbide featuring carbide tipped flutes let you create delicate and decorative accents in any wood or wood derivative.

SHOP TIPS: more than one pass is recommended when making cove edges. To prevent splintering, begin with a shallow initial pass and deepen gradually. Never use pieces shorter than 600mm.

Ovolo Bits

7/8/927

The perfect bit for furniture makers, the CMT ovolo allows you to make beautiful beadwork, edgework and veins as well as a wide variety of single and double bead profiles and roundovers.

SAFETY TIPS: pay particular attention to never rush the job when using a large profile bit. Mill pieces with a fence mounted on the work table to ensure maximum protection.

Roundover Bits with Insert Knives

661.11

Roundover bits with two replaceable knives fixed by special TORX® screws. The blades are profiled on 2 sides and increase the efficiency of your work with laminates and chipboard, as well as hard and soft woods. For use on portable routers.

Drawing is 1:1 scale

661.41

Standard
R=3mm 790.030.04

Optional
R=1mm 790.010.04
R=1,5mm 790.015.04
R=2mm 790.020.04

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Roundover Bits

7/8/938

All CMT roundover bits provide a wide variety of profiles to create beautiful decorative edgework on furniture or boats. Lower the bit to expose the straight part of the cutting edge in this way you can apply a decorative edge to tables, shelves and beams.

SHOP TIPS: use the 1.6mm radius roundover bit for finishing laminates. A simple height adjustment helps save time on finishing.

SAFETY TIPS: use caution when working with large diameter bits and make more than one pass to gradually remove stock.

SHOP TIPS: after resharpening, replace bearing 791.003.11 (Ø12,7mm) with undersized bearing 791.063.00 (Ø12,5mm)

Roundover Set

838

Drawing is 1:1 scale

DESCRIPTION	Box	ORDER NO. S=Ø6,35mm	ORDER NO. S=Ø12,7mm
Roundover set	5	838.001.11	838.501.11

CMT's roundover sets give you the maximum flexibility for all of your projects by putting the most requested diameters in one package. Available in 12,7mm and 6,35mm shanks. Roundover radii are 6,35mm, 9,5mm and 12,7mm. These versatile bits are always in demand - the simple clean lines of a smooth roundover edge can be used in a wide variety of applications from picture frames to table and counter tops.

DP - Corner Rounding Router Bits for composites and laminates

938 XTREME

These new super duty DP (polycrystalline diamond) bits represent the ultimate in the extensive line of CMT rounding over bits. These bits save you both time and money, as they last 40 times longer than conventional bits. Work a wide variety of tough, abrasive materials including composites, particleboard, MDF (both raw or with melamine), veneer and hardwoods.

Excellent for Corner Rounding:

- Aluminum
- Aluminum Composites
- Aluminum Composite Material (ACM)
- Composites
- Composite Panels
- Custom Composite Materials
- Fiberglass
- Fiberglass PCB Board
- Fiberglass Reinforced Composites
- Fiber-Reinforced Urethane
- Fiber-Reinforced Structural Foam Floors
- Hard and Soft Wood
- Lightweight Composites
- MDF
- Plastic

Benefits of Diamond Technology

- Harder cutting edge provides higher resistance to wear
- Cut thousands of meters more than carbide without changing tool, saving setup time
- Optimized machine tool efficiency
- Quality of finish is often significantly improved

Decorative Ogee Bits

7/8/965.1

This new CMT bit produces a classic single or double edged bead. Ideal for creating a marked decorative effect on panel, door and drawer work.

Drawing is 1:1 scale

Roman Ogee Bits

The roman ogee may be the most popular edge treatment in woodworking, and it is certainly one of the most beautiful and varied in classic design.

SHOP TIPS: given the complexity of this kind of machining, for best results, multiple passes are recommended.

Drawing is 1:1 scale

An extra horizontal cutting edge provides refined style and elegance to these traditional profiles **7/8/940**.

SHOP TIPS: for best results, multiple passes are recommended.

Classical Ogee Bits

Drawing is 1:1 scale

CMT's classical ogee bits feature an inverted ogee profile, with the concave edge adjacent to the upper surface of the workpiece. A vertical bead was added to separate the curves and creates an attractive detail.

SHOP TIPS: this type of machining can be very challenging, for best results, multiple passes are recommended.

This profile includes a horizontal bead along the bottom of the profile adding a decorative detail to the traditional ogee design.

SHOP TIPS: for best results, multiple passes are recommended.

Adjustable Roundover & Bevel Router Bits

8/900.623

These CMT bits are ideal for making attractive edgework! Create a double 4,76mm (3/16") roundover profile, a double 45° bevel or even a mixed profile on your wood panels easily and in a cost-effective way! Interchangeable shims are included to allow for different stock thicknesses according to the board. To be used on table-mounted routers. Do not use these bits with hand-held power tools.

Wainscot/Paneling Bits

8/961.6

This new router bit designed for 19mm (3/4") thick stock is perfect for creating wainscots and panels on your walls. Simply create a 6,35mm (1/4") tongue-and-groove interlock with a CMT 8/900.626.11, then, with two passes mill an attractive traditional beadboard profile with this new bit. Perfect for cabinets, bookcase backings, ceiling and wall paneling.

Corner Beading Bits

7/8/961

Make beautiful traditional beads and edge beads or turn old beads into new moldings with the new CMT corner beading bits with bearing. Featuring carbide-tipped cutting edges and orange P.T.F.E. non-stick coating, these bits provide excellent results on corner beads. Run the bead twice to form a complete corner bead.

CMT Moulding System

8/956.852

If the standard selection of moulding and mill work you find in today's lumber shops isn't satisfactory to your woodworking tastes, then look to CMT's moulding system instead. With these bits, you can make dozens of elaborate profiles by combining two or more passes. Avoid the average and create your own mouldings. Some initial suggestions are illustrated below.

SAFETY TIPS: use these bits with a fence. The profiles shown below are milled from heavy stock then refined to the desired shape.

8/956.851

Drawing is 1:1 scale

PROFILE	D mm	I mm	L mm		ORDER NO. S=∅12mm	ORDER NO. S=∅12,7mm
A	31,7	23	61,1	10	956.852.11	856.852.11
B	31,7	19	57,2	10	956.851.11	856.851.11

8/956.8

Create endless profiles with CMT multiprofile bits. Simply adjust the height of the bit to create classic profiles in one single pass, or make more complex decorative effects in multiple passes. The bits super-strength steel body can withstand long-lasting cutting operations, and the micrograin carbide tips remain sharp longer for superior performance. In addition these bits feature non-stick P.T.F.E. coating and anti-kickback design. To be used on tables equipped with a fence.

SAFETY TIPS: to make small mouldings as shown below, cut the profile from large stock, removing excess material as you work as this will facilitate easier control. Keep hands far from the bit when working.

Drawing is 1:1 scale

PROFILE	D mm	I mm	L mm		ORDER NO. S=Ø12mm	ORDER NO. S=Ø12,7mm	Spare parts

Moulding Bits

For best results use these bits with 1800W routers. It is possible to use 1100W routers but only for brief passes that are short in depth.

SHOP TIPS: multiple pass operations require advance planning. To avoid making a mistake that could render it impossible to finish the job, carefully consider the entire cutting sequence before you begin.

SAFETY TIPS: all large diameter bits such as these should be used with caution and on router tables equipped with a fence. When possible, reduce the RPM.

Moulding Bits

8/967.5B - 8/967.6B

CMT's new moulding bits allow you to shape elegant moldings with your table saw and router. Unlike any commercially available crown moldings, moldings made with these bits are easy to install and create a finished appearance. After shaping the cove, you can use special router bits with inverted profiles to create different edges and complete the moulding.

Window Sill & Finger Bits

8/955.8 - 8/955.8B

Originally, these profiles were designed for shaping the edges of window sills. Yet, these bits also can be used to create finger pulls on the edges of doors and drawers. These bits are available with top bearings for curved template work or without bearings for straight cuts against a fence. Recommended for router table use only.

Table Edge & Hand Rail Bits

8/956.701

The **8/956.601.11** guarantees well-proportioned smooth curves. Complete the job with the **8/956.701.11** bit featuring a 30° bevel edge and a 3.2mm bead for beautifully functional hand rails.

SAFETY TIPS: these profile bits remove large amounts of stock and produce consistent quantities of dust. We recommend using a vacuum to keep the work area safe.

Vertical Raised Panel Bits

8/990.6

Use a sturdy 90° angle fence on your router table along with routers with a minimum speed of 1,7 KW (2-1/4 HP). Routers as low-powered as 1,1 KW (1-1/2 HP) can be used but we suggest limiting their use to shorter, shallower runs.

SAFETY TIPS: the template must be at least 150mm and clamps should be used whenever possible. Three to five passes are recommended to safely and accurately obtain the profile you desire.

The ABC's of Panel Door Construction

In our step-by-step example of panel door construction, we used the following:

- CMT Rail & Stile set (item **891.502.11**)
- CMT Reverse Glue Joint (item **855.501.11**)
- pre-cut to length stiles - 19mm thick x 57mm wide
- pre-cut to length rails - 19mm thick x 57mm wide
- panel - 16mm thick
- scrap stock

The CMT Rail & Stile set was designed ideally for the construction of panel doors from 19mm thick stock, however any variation of size up to 22mm thick can be used. Remember to adjust your measurements and cutting depths according to the wood thickness you use.

MILLING THE RAILS AND STILES

First make trial cuts of the cope profile (rail) and the stick profile (stile) in scrap stock and check the accuracy of the joint. This is extremely important when working at maximum thickness (22mm). Make sure your stock is flat and cut straight with square edges. Using the CMT Stile Bit shown in illustration A, place the stock front face-down on the router table and mill the cope profile in the stile and rail pieces. To mill the rails, use the CMT Rail Bit shown in illustration B, position the rails face-down on the router table and mill the cope profile on the ends. If you are milling cope and stick profiles before cutting the rails and stiles to length, be sure to make the proper calculations before cutting the rails. The stiles are the same length as the door. The rails must be calculated by the following equation (CMT standard tenon length is 22mm):

(total door width - sum of stile widths) + sum of 2 tenons = total rail length
 therefore, using our example measurements listed above, for a 300mm cabinet door:
 $300\text{mm} - 114\text{mm} + 22\text{mm} = 208\text{mm}$

GLUEING UP PANELS

If the panel requires a width greater than the width of your stock, you will need to edge glue stock for the central floating panel. This is accomplished by simply using the CMT Reverse Glue Joint bit. For making a two panel glue joint, place the first panel front face-down on the router table and accurately centre the wood to the bit. Adjust the bit according to the thickness of the wood you are cutting by lining up the cut edge of the wood to the centre point of the bit as illustrated in illustration B and mill the cut edge of the wood. Place the second panel front face up and repeat the milling process. This assures you will have the best side of your stock as a front face. If a third panel is required, mill one cut edge of the piece as instructed above, turn the piece over and run the other edge. Assemble the reverse cut pairs together for beautiful, strong joints that match up perfectly.

MILLING THE FLOATING PANEL

Make trial cuts in scrap stock to create a tongue that fits snugly into the groove in the stile without forcing it. To cut your panel to size be sure to make the proper calculations, taking into account the length of the tongue. The CMT Raised Panel Bit in our example has a standard tongue length of 8mm (The New CMT Raised Panel Bit profile has a 9,5mm tongue).

Use the following equation:

(Total door length - Sum of Stile widths) + Sum of 2 Tongues = Overall Panel Length

Therefore, using our example, measurements listed above for a 600mm long cabinet door: $(600 - 114) + 16\text{mm} = 502\text{mm}$

And accordingly:

(Total door width - Sum of Stile widths) + Sum of 2 Tongues = Overall Panel Width.

Once the panel has been cut to proper dimensions, position the panel front face side down on the router table tongue as shown in illustration C and use the CMT Raised Panel Bit to mill the tongue. **ATTENTION:** this bit is capable of removing large amounts of stock. To safely and effectively produce the profile you want, we suggest making several shallow passes. It can be dangerous to try to mill the entire profile in a single run.

8/991

The CMT male-female rail and stile sets are a perfect pair for this particular project and produce clean, precise and well-crafted joints. Designed for working in stock from 18mm to 22mm.

SHOP TIPS: quality workmanship is the result of a lot of trial and error. Set aside a variety of small pieces for trial cuts.

8/991.521

The new CMT One-Piece Rail and Stile Bit represents the union of two cutters in one bit. By simply adjusting the height of the bit, you can cut two perfectly joining profiles with no wasted time or effort moving the fence or changing the bit. Save time and money by investing in one single CMT cutting tool.

SHOP TIPS: the complicated nature of this kind of project requires a lot of practice and you need to carry out trial cuts. Always keep a variety of test pieces on hand.

Raised Panel Bits

8/990

Make classic raised panel doors by choosing from the profiles illustrated below. Its anti-kickback design is fundamental in further improving safety when working with larger diameter bits.

SAFETY TIPS: This type of bit needs to be used at a lower rotational speed, preferably between 10,000 and 12,000 RPMs. Three to five passes are recommended to safely and accurately obtain the profile you desire. To be used on routers with at least 1800 KW.

Raised Panel Bit with Back Cutter

8/990.5

These bits have a back-cutter which allows you to rout both the front and back of the panel in the same cut which saves time and money.

SAFETY TIPS: to ensure improved safety when using the Ø89mm bit, carry out the cut in 2 shallow passes: use a Ø37mm bearing for the first pass, and then a Ø16mm bearing for the second pass.

Stile & Panel Router Bits

8/970

These bits can be used for decorative work on solid wood panels and MDF materials. Use them in one pass or in combination with CMT's MDF panel bits for complex and intricate profiles. A simple approach for an elegant appearance.

Featuring large cutting diameters and available in the most popular profiles, these panel bits guarantee excellent performance.

Divided Light Door Set

800.525 - 900.025

Build authentic divided light doors for fine furniture and cabinets with these 3 piece sets. They include a stuck bit to cut the decorative ovolo profile on the frame edges, a cope to shape the mating profile on the ends of the stock, and a rabbeting bit to cut the recess for the glass. Thanks to the guide bearings, you can also create arches on curved frames. The unique design of the cope bit allows you to use full-length tenons to create strong, authentic mortise-and-tenon joinery. As the stock is coped, the tenon passes over the bit. These sets are designed for 22,2mm wide bars such as those on corner cupboard doors.

DESCRIPTION		ORDER NO. S=Ø8mm	ORDER NO. S=Ø12,7mm
Divided Light Door Set	1	900.025.11	800.525.11

Glass Panel Set

8/955.803

CMT's unique stile and rail router bit sets allow you to produce glass panel doors by using a rubber panel retainer to secure the glass in a 3,2mm slot cut into the frames. These bits work the same as other CMT stile and rail sets, but they leave you with a square rabbet on the inside of your door for installing the glass panel. Available in 12mm and 12,7mm shanks.

DESCRIPTION		ORDER NO. S=Ø12mm	ORDER NO. S=Ø12,7mm
Glass Panel Set	1	955.803.11	855.803.11

GLASS PANEL RETAINERS

HERE'S HOW IT WORKS:

Mill the cope and pattern cuts first, then use the slot cutter to cut the groove for the rubber panel retainer. The edge of the pattern cut will ride on the bearing of the slot cutter bit. When you cut the slot in the rails you can cut the slot the full length of the stock. When you cut the slot in the stiles you need to set up reference points to stop and start the cuts so they are hidden from view on the top and bottom of the doors.

Entry & Interior Door Router Bit Set

8/900.527

This is a multifunctional set for door and furniture makers, building entry or passage doors and furniture tenons. The tenon cutter included in the set, produces a beefy 27mm long tenon. As an extra bonus, the tenon cutter can be used for making furniture requiring tenons anywhere from 9.5mm to 16mm in thickness.

**ENTRY & INTERIOR DOOR CONSTRUCTION
EASY AS 1, 2, 3!**

STEP 1. Cut the tenon into the rails

STEP 2. Cut the groove and door profile in pieces.

STEP 3. Undercut the tenons to cope the ends of the rails.

DESCRIPTION		ORDER NO. S=Ø12mm	ORDER NO. S=Ø12,7mm
3 Piece Entry & Interior Door Router Bit Set	1	900.527.11	800.527.11

2 Piece Entry Door Router Bit Set

8/955.806

One of the more popular bits among both artisans and professional carpenters, this tool allows you to create tongue and-groove joints and produce entry and passage doors with minimal effort. Incredible versatility!

ENTRY & INTERIOR DOOR CONSTRUCTION

APPLICATION 1: cut the groove and the door profile in all pieces.

APPLICATION 2: undercut the tenon to cope the ends of the rails.

Tenon Cutting Router Bits

8/900.628

8/900.627

CMT's tenon cutting router bit will produce the most perfect fitting tenons in every board you cut, even if the boards vary in thickness. Simply set the distance between the cutters using the included spacers, and you can easily cut tenons from 4,76mm to 9,5mm thick, and up to 27mm long. This simple-to-use router bit takes the mystery out of tenon-to-mortise fit required for high quality joinery.

The Cabinetmaking Set

800.515 - 800.520

Available with raised panel bits in two different profiles, these sets feature six router bits for making arched raised panel doors and professional drawer fronts. These sets include:

OGEE RAIL & STILE BITS: these two perfectly matched tools will eliminate the frustration of setting up reversible cutters. The stile bits also feature shear angles for neater cuts.

RAISED PANEL BIT WITH BACKCUTTER: this 88,9mm diameter bit features a backcutter for milling both the front and the back on the panel in a single cut. We recommend using a 31mm diameter bearing to work safely in two shallow passes.

SUPER-DUTY FLUSH TRIM BIT: this 19mm diameter bit gives you a superior cut with minimal chipping, even on end grain.

OGEE DOOR EDGE BIT: a subtle cove followed by a subtle roundover adds an elegant touch to your door edge.

DRAWER FRONT BIT: this bit makes a mini-raised panel cut on the outside edges of your drawer fronts.

Small Arch Door Set

800.524 - 900.024

These 3 piece sets will produce beautifully raised panel doors with a classic bevelled profile. Designed for use in fine furniture making, these sets include two matched cope and stick bits to produce frames from 15,87mm to 19mm in thickness. The stick bit shapes a decorative 4,76mm thumbnail moulding along the edge of the frame.

The panel bit is designed for material 12,7mm in thickness. All bits are equipped with guide bearings for shaping curved work such as the small arched panel doors seen on secretaries and corner cabinetry.

These sets also produce panels for small chests, lids for small boxes, or drawer fronts.

Available in 8mm and 12,7mm shanks.

DESCRIPTION	Box	ORDER NO. S=Ø8mm	ORDER NO. S=Ø12,7mm

Panalign Strips

Beautiful panel doors can be ruined by a poorly-aligned panel. Next time, slip panalign strips into the rails to keep panels perfectly centred while allowing for expansion. Unlike carpet foam, which eventually loses elasticity and ceases to work, the rubber in panalign strips is specially designed to spring back indefinitely. The rectangular shape makes the strips easy to handle. Typical doors require 4 to 8 strips each.

Adjustable Shaker Router Bit Set

8/900.624

These new bit sets are excellent for producing adjustable tongue and groove joints with a bevel, in order to eliminate panel rattle that may occur with the production of standard cabinets. Cut precise grooves into your plywood veneered panels and make perfect rattle-free fits. To be used on table-mounted routers. Avoid using these bits in hand-held power tools.

Adjustable Tongue & Groove Bit Set for Mission Style Cabinet Doors

8/900.625

Exclusive CMT design which allows the perfect fit for undersized plywood panel. The tongue cutter features opposing shear angles to obtain flawless finishing on a large variety of materials such as plywood, softwood and hardwood.

For use on a table-mounted router. Not for handheld routers.

- Adjustable in 0.050mm (0.002") increments;
- For groove width from 5mm to 13,5mm;
- Cut stock thickness of 12,7mm to 31,7mm;
- Features micrograin carbide for longer life.

Slot Cutter Set

8/923.001

Create slots, grooves and rabbets on all materials using these slot cutter sets. Ideal for biscuit and tongue and groove joints. These sets include 4 different bearings to allow a cutting depth of 8mm, 9,5mm, 12,8mm and 14,3mm. Please refer to the chart below for applications and the correct cutter combinations.

SAFETY TIPS: never use the slot cutter sets without shims between cutters, whose distance can vary from 1mm to 1,7mm. Shims can also be positioned between the ball bearings and the cutters.

Router Bit Set with Insert Knives

600.005.01

This set is the perfect companion for the professional craftsman. We offer the 5 most popular bits with reversable knives complete with 10 spare knives and 2 TORX® keys. They are perfect for working on all materials such as solid wood, wood derivatives, laminates, MDF, and plastic materials. For use with a hand held, point-to-point machine or CNC router.

Drawing is 1:1 scale

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

5 Piece Spiral Bit Set

191.0/192.0

This new set of high quality solid tungsten carbide upcut and downcut spiral bits come in the most popular diameters: 4-8-10-12mm. These bits featuring sharp long-lasting cutting edges guarantee perfect high quality cuts, and the spiral layout allows for a more efficient chip ejection. Recommended for use on hardwood, wood derivatives, laminates and plastic materials.

CONTRACTOR ROUTER BIT FROM CMT

DELUXE PACKAGING

For value-driven contractors, remodelers and DIYers. Great quality/price ratio and long-lasting performance.

HEAT-TREATED SHANK & BODY FOR GREATER DURABILITY

The bits are made from the finest steel hardened to reach 58 Rockwell which ensures durability and good cutting performance.

ANTI-KICKBACK DESIGN

Controls depth of cut and minimizes kickback reducing your risk of injury.

SINTERHIP HI-DENSITY CARBIDE

New process called SinterHIP (Hot Isostatic Pressing), helps prevent material failure and increases cutting life.

CORROSION-FREE BLACK COATING

Protects against corrosion and provides a longer bit life.

PRECISION GROUND CUTTING EDGES

Each cutting edge is precisely sharpened to obtain a sharp and durable cutting angle.

K911-K912

Designed for making slots and routing channels in wood and wood composites. Hi-Density carbide-tipped cutting edges provide smooth performance and a precise cut. Engineered for efficient chip clearance.

What work parameters are best when routing?

Answering the following questions will provide you with the answer!

- **What equipment are you using?** Using brand new equipment of high quality is not the same as using outdated machinery! It is important to understand that vibration is the direct result of wear and tear, which can lead to a poor quality finish. Feed rate should be chosen in order to dampen vibration, and quite often, higher feed rates are associated with better finishing results.
- **What factors influence the performance of the bit I am using?** Many factors affect performance and the ultimate finish of the workpiece: the power of the collet chuck, the rigidity and eccentricity of the couplings, conditions and quality of the collets, reverse locking system, sharpened tool edge, the dust-collection system in use and even the relative humidity of the workplace environment.
- **What bit should I use?** The number of cutting edges as well as the cutting diameter significantly affect work parameters. In general, the more cutting edges and the wider the blade diameter, the higher the feed rate.
- **What is the cutting depth I hope to carry out?** In order to increase cutting depth, it is necessary to reduce the feed rate and vice versa for shallower cuts.
- **At what speed does my machine run?** By increasing the spindle speed (rpm), the quality of the finished edge improves. However, at the same time friction also increases between the tool and the workpiece. As a result, tool longevity is compromised. Ideally, the objective is to select the slowest rotation speed possible compatible with the quality of finishing you hope to achieve.
- **What edge finish am I looking to achieve?** Coarse routing and fine routing are definitely not the same thing! You need to figure out what is more important: quality or quantity. In order to prolong the life of your cutting tool, its best to choose the highest feed rate possible best suited to achieve the finish you want.
- **Above all....what materials am I working with?** Wood is a good example of natural fiber composite. It is made up of a natural fibrous material, both elastic and flexible (cellulose: long molecular polymer chains), bound together by a very rigid substance (lignin: cross-linked polymer) as well as a compatibilizer (hemicellulose: a polysaccharide). It is an anisotropic material, that is, directionally dependent, changing with direction along the object. How many types of wood and wood derivatives are you familiar with? Remember, no two pieces of wood are the same! In fact, the same work parameters carried out on two different pieces of wood will provide two very different results.

Feed rate is dependent of several factors, like the ones mentioned above - and these are just a few examples. It is important to weigh all factors in order to select an optimum feed rate suitable for the tools and work objectives involved. CMT is synonymous with quality and to produce high quality cuts you just can't randomly shoot off a bunch of numbers. Be wary of those who provide you with random numbers.

I get it....but where do I start? *The best way to go forward is step-by-step using reliable test data.* To quickly achieve the results best suited for your specific work expectations, you can always turn to theory!

One rule of thumb, which may prove advantageous, is to use a simple gauge to measure chipload wherever possible. On the one hand, it should be noted that when chips that are too thick, breakage will occur, resulting in a poor, rough finish. On the other hand, when chips are too thin, it will negatively affect tool longevity and cause rapid wear and tear of the cutting edge because the teeth of the tool are rubbing more than removing material.

The next time you experiment, you need to properly assess the specific demands of the work involved, assess chipload measurements and try to orient yourself towards a different thickness by taking into account the aforementioned factors. Then, with the aid of the formulas listed below, proceed to establish the appropriate feed rate for your next test. This will help you to achieve better results faster and you will have the essential information you will need for the next work project.

PARAMETERS:

V = Feed rate (m/min)

Z = Cutting edges

C = Chipload (mm)

FORMULAS:

V = (RPM x Z x C) / 1000

RPM = V x 1000 / (Z x C)

EXAMPLE:

with caliper take measurement of a good result chipload (C=0,2mm).

Z=2

RPM=18000

V = (RPM x Z x C) / 1000 = (18000x2x0,2) / 1000 = 7,2m/min

PROBLEM SOLVING

PROBLEM

Bad finishing
Cutting edge wear
Cutting edge burns
Cutting edge debris
Vibrations
Cutter breakage

SOLUTIONS

<ul style="list-style-type: none"> • Cutting depth • Vibrations

Kinetic Dust Extractor

992 REMOVES MDF & CHIPBOARD DUST FROM THE WORKPIECE

DESCRIPTION	D mm		ORDER NO.
Kinetic Dust Extractor for chucks with ER20	80	1	992.081.ER20
Kinetic Dust Extractor for chucks with ER25	80	1	992.081.ER25
Kinetic Dust Extractor for chucks with DIN6388/EOC25 collets	100	1	992.101.EOC25
Kinetic Dust Extractor for chucks with ER32 collets	100	1	992.101.ER32
Kinetic Dust Extractor for chucks with ER40 collets	100	1	992.101.ER40

Spare parts: **991.285.00** C-Spanner 80-90mm (ER20/ER25)
991.284.00 C-Spanner 95-100mm (EOC25/ER32/ER40)

EASY TO USE!

Installation and removal just like a clamping nut

- Better health & safety on the worksite
- Better air quality on the worksite
- Improves tool performance & cut quality
- Longer tool life & reduced labor costs
- Recommended for Nesting and routing operations
- No wasted time throughout operation
- Replaces the standard clamping nut
- Suitable for any collet chucks with standard router bits
- Available for ER32 - ER40 - EOC25 (DIN6388) collets
- Tough ceramic coating offers anti-corrosion, anti-friction and anti-static protection.
- Tool body in light alloy
- Lightweight and quiet
- Performs even at low RPM: from 6,000 up to 20,000 rpm
- Materials: chipboard, coated chipboard, MDF, CORIAN®, plasterboard, OSB, HPL.

SAFETY TIPS

The **TW-200** Torque Wrench is recommended for the proper fastening of clamping nuts (see page 413).

Always use vacuum system.

HSK-63F Chucks for "ER32" Precision Collets

183.300 XTREME

S	TO BE USED WITH COLLET	ORANGE CHROME	NOTE	Box	ORDER NO. Right-hand rotation	ORDER NO. Left-hand rotation
HSK-63F	ER32	✓	Clamping nut without bearing	1	183.300.01	183.300.02
HSK-63F	ER32	✓	Clamping nut with bearing	1	183.300.11*	
HSK-63F	ER32		Clamping nut without bearing	1	183.300.91	
HSK-63F	ER32		Clamping nut with bearing	1	183.300.93*	

Optional: 990.118.00 M6x10mm screw

* Suitable for right-hand and left-hand rotation.

For HOMAG®, EIMA®, IMA® FROM 9/94, WEEKE®, BIESSE®, SCM®, MORBIDELLI® and MASTERWOOD® machines.

NON-STICK ORANGE CHROME® SHIELD COATING

- Prevents overheating.
- Protects against corrosion and rust.
- Reduces resin build-up.
- Longer life and greater tool performance.

SAFETY TIPS

The **TW-200** Torque Wrench is recommended for the proper fastening of clamping nuts (see page 413).

HSK-63F Chucks for "ER40" Precision Collets

183.310 XTREME

S	TO BE USED WITH COLLET	ORANGE CHROME	NOTE	Box	ORDER NO. Right-hand rotation	ORDER NO. Left-hand rotation

Universal Assembly Supports for Chucks

183

SUITABLE FOR	D mm		ORDER NO.
HSK-63, BT40, ISO40 DIN 2080, SK40 DIN 69871, CAPTO® C6	63	1	183-HSK
ISO30, DIN 2080, SK30 DIN 69871, HSK50, CAPTO® C5	50	1	183-ISO*

*Not compatible with chucks **183.250** and **183.251**

CMT now offers new universal assembly supports for HSK-63F and ISO30 chucks. Thanks to the bi-directional roller bearings, which clamp the Left-hand rotation to the flange, the system offers the highest protection to the tool taper and clamps are no longer needed.

X-TREME COATING

THE ULTIMATE TECHNOLOGY FOR INDUSTRIAL CNC TOOLS

DLCS is a modified diamond-like carbon coating with superior load bearing capacity. This hard, durable metal-based finish (chromium nitride) provides an higher hardness surface and enhances the tribological properties of the carbon coating. Its application prevents excessive heat build up which is detrimental to performance. This means cutting tools remain fully effective after every use.

<p>Extreme Coating Hardness >HV 2.500</p> <p>Offers impressive hardness on cutting edges as well as outstanding protection against wear and tear.</p>	<p>Minimal coating thickness µm 2-4</p> <p>This micron thin finish guarantees perfectly sharpened edges for high cutting quality.</p>	<p>Provides the lowest coefficient of friction 0,1-0,2</p> <p>Very good running-in and low friction losses. Reduction of sticking. Ideal for high speeds in Nesting applications.</p>	<p>Optimal resistance to heat build up</p> <p>Reduced overheating. Cutting edges resist excessive wear up to 400°C.</p>

BENEFITS

3X
LONGER LIFE
THAN UNCOATED

DLCS CHROME COATING

PROVIDES 3 TIMES LONGER LIFE THAN UNCOATED TOOLS!

Test performed in U.S. with 1/2" solid carbide compression spiral bit

- MACHINE:** FELDER® Profit H10 Nested Base/Overhead CNC Router
- WORKING PARAMETERS:** RPM = 18,000 - Feed = 20 mts/minute
- MATERIAL:** 19mm Melamine Chipboard
- APPLICATION:** Nesting Full Dimensioning
- PERFORMANCE:** DLCS coated bit cut 165 melamine panels
Uncoated bit cut 56 melamine panels

FELDER® Profit H10

DLCS coated bit

Melamine Chipboard

Cut quality after 165 panels

TECHNICAL DETAILS:

- Premium quality HWM.
- 1+1 spiral cutting edges [Z1+1].
- 2+2 spiral cutting edges [Z2+2].
- 3+3 spiral cutting edges [Z3+3].
- Provide an excellent finish on both the upper and the lower side of the workpiece.

APPLICATION:

used for efficient contour cutting, end-trimming and panel sizing on solid wood, wood composites, plastic materials and laminates at high feed speed. Ensure to properly clamp workpieces. Can be used on machining centres, point-to-point boring machines, CNC routers and hand-held routers equipped with chucks or adaptors.

Results shown in this diagram are purely empirical, based merely on informative and hypothetical calculation. Each application may require different parameters in consideration of materials in use and machining conditions. CMT is not responsible for direct, indirect, incidental or consequential damages resulting from any defect, error or failure due to this diagram.

20	102	165	20	1	194.202.11	

TECHNICAL DETAILS:

- Premium quality HWM.
- 3 spiral cutting edges [Z3].
- **Provide an excellent finish on the upper side of the workpiece.**
- Downward chip ejection.

APPLICATION:

used for efficient contour cutting, end-trimming and panel sizing on solid wood, wood composites, plastic materials and laminates at high feed speed. Ensure to properly clamp workpieces. Can be used on machining centres, point-to-point boring machines, CNC routers and hand-held routers equipped with chucks or adaptors.

Results shown in this diagram are purely empirical, based merely on informative and hypothetical calculation. Each application may require different parameters in consideration of materials in use and machining conditions. CMT is not responsible for direct, indirect, incidental or consequential damages resulting from any defect, error or failure due to this diagram.

20	60	120	20	1	197.200.11	
20	72	120	20	1	197.201.11	

TECHNICAL DETAILS:

- Premium quality HWM.
- 4 spiral cutting edges (2 with chipbreaker) [Z2+2R].
- Max 0.1mm tooth depth.
- **Provide excellent finish on the lower side of the workpiece.**
- Upward chip ejection.

APPLICATION:

used for efficient contour cutting, end-trimming and panel sizing on solid wood and wood composites. Can be used on machining centres, point-to-point boring machines, CNC routers and hand-held routers equipped with chucks or adaptors.

The special 4 flute design (Z2 finishing + Z2R with chipbreaker) allows high speed with excellent finish on the workpiece.

WITHOUT CHIPBREAKER						
16	95*	45	150	16	1	193.162.11

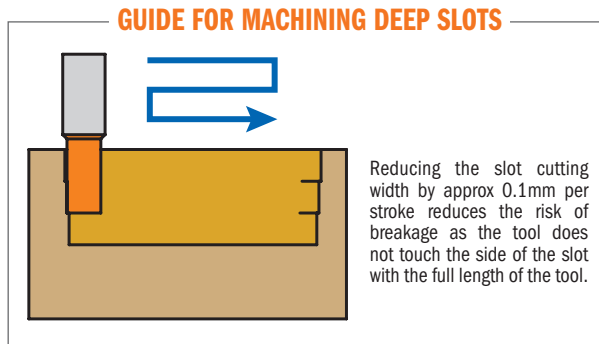

* The maximum cutting length is achieved in 2-3 passes.

TECHNICAL DETAILS:

- Premium quality HWM.
- 3 spiral cutting edges [Z3] and [Z3R].
- Max 0.3mm tooth depth.
- **Provide an excellent finish on the lower side of the workpiece.**
- Seat for seeger ring (*not included*).
- Upward chip ejection.

APPLICATION:

used for efficient contour cutting, end-trimming and panel sizing on solid wood, wood composites, plastic materials and laminates at high feed speed. Ensure to properly clamp workpieces. Can be used on machining centres, point-to-point boring machines, CNC routers and hand-held routers equipped with chucks or adaptors.

Solid Carbide Upcut Spiral Bits with Chipbreaker for 60° V-Point Locksets

195.143/163

D mm	I mm	L mm	S mm		ORDER NO. Right-hand rotation

16	55	110	16	1	195.163.11

Solid Carbide Upcut Spiral Bits without Chipbreaker for 60° V-Point Locksets

191.143/163

D mm	I mm	L mm	S mm		ORDER NO. Right-hand rotation
14	50	110	14	1	191.143.11
16	55	110	16	1	191.163.11

TECHNICAL DETAILS:

- Premium quality HWM.
- 3 spiral cutting edges [Z3].
- **Provide an excellent finish on the lower side of the workpiece.**
- Upward chip ejection.

APPLICATION:

used for efficient contour cutting, end-trimming and panel sizing on solid wood, wood composites, plastic materials and laminates at high feed speed. Ensure to properly clamp workpieces. Can be used on machining centres, point-to-point boring machines, CNC routers and hand-held routers equipped with chucks or adaptors.

Spiral Bits with Insert Knives & Chipbreaker for Locksets

662

D mm	I mm	L mm	S mm		ORDER NO. Right-hand rotation
16	23/95*	150	16	1	662.160.11

Spare parts		
790.230.2R - 790.230.3R	990.082.00	991.063.00

Spare parts: **790.230.2R** 23x7x1.5mm 2-RT HWM K2020 knives (Minimum 10 pieces or multiple)
790.230.3R 23x7x1.5mm 3-RT HWM K2020 knives (Minimum 10 pieces or multiple)

* The 95mm length is achieved in 4-5 passes.

TECHNICAL DETAILS:

- DENSIMET® high density tungsten alloy for low-vibration.
- 2 cutting edges [Z2R] with chipbreakers.

APPLICATION:

used for efficient contour cutting, end-trimming and panel sizing on solid wood, wood composites, plastic materials and laminates at high feed speed. Ensure to properly clamp workpieces. Can be used on machining centres, point-to-point boring machines, CNC routers and hand-held routers equipped with chucks or adaptors. Cost-effective solution with respect to brazed and spiral in tungsten carbide.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

GUIDE FOR MACHINING DEEP SLOTS

Upcut Spiral Bits with Chipbreaker for Glue-Laminated Wooden Beams

195

D mm	I mm	L mm	S mm		ORDER NO. Right-hand rotation
□ 30	170	235	30	1	Y195.300.51
40	165	235	30	1	195.400.51
50	215	295	30	1	195.500.51

□ On request

Available by special request bits without chipbreaker, with left-hand rotation and/or custom dimensions.

TECHNICAL DETAILS:

- High speed cobalt steel.
- 3 upcut spiral cutting edges with chipbreaker [Z3R].
- Resharpenable cutters.
- Max 6000~10000 RPM.
- Maximum feed speed 2m/minute.
- Upward chip ejection.

APPLICATION:

used for cutting, copying, and routing on glue-laminated wooden beams. For use on HUNDEGGER® machines.

Solid Carbide Upcut 2D/3D Carving Tapered Ball Nose Spiral Bits

152

D mm	R mm	A	I mm	L mm	S mm	Z		ORDER NO. Right-hand rotation
0,8	0,4	5,5°	25	70	6	3	10	152.060.082

6,4	3,2	3°	50,8	101,6	12,7	2	10	152.127.635

TECHNICAL DETAILS:

- Premium quality HWM.
- Upcut spiral cutting edges [Z2/Z3].
- **Excellent finish on the lower side of the work piece.**
- Upward chip ejection.

APPLICATION:

- especially designed for 2D and 3D CNC profiling and carving in plastic, aluminum & wood for several uses like:
- A perfect bit for 3D carving
 - Precision 2D and 3D large scale carving
 - Great for deep profiling
 - Dimensional signage
 - 3D millwork
 - 2D and 3D contouring, profiling, modeling and pattern making for cabinetry, sign making, furniture making and jewelry mold making
 - Perfect for model-makers on large 3D milling profiles in abrasive EPS foam and other materials.
 - **Ideal on aluminum, plastic and wood-based materials.**

EXCELLENCE FOR CUTTING

- Acrylonitrile-Butadiene-Styrene (ABS)
- Acrylic
- Acrylic Stone
- Aluminum
- Brass
- Bronze
- Composite
- Copper
- Ethylene-vinyl Acetate Foam (EVA)
- Expanded Polypropylene (EPP)
- Expanded Polystyrene Foam (EPS)
- Extruded Polystyrene Foam (XPS)
- Fiberglass
- Fiberglass PCB Board
- Foam Board

- Graphite
- HDPE
- HDU
- 20lbs High Density Urethane
- MDF/HDF
- Phenolics
- Phenolic Composites
- Plastics
- Poly (methyl methacrylate) (PMMA)
- Polyethylene Foam
- Polyurethane Foam
- PVC
- PVC Foam Board
- Sign Board
- Sign Foam

- Titanium
- Tooling Board
- Wood
- XPE (Cross Linked Polyethylene) Foam

ALSO EXCELLENCE FOR

- CORIAN®
- COROPLAST®
- DIBOND®
- ETHAFOAM®
- LEXAN®
- PALFOAM®
- POLYLAM®

TIPS FOR MILLING PLASTICS

- pay attention to heat input
- pay attention to chip-loads when using small diameters
- use air-blast to keep chip away and cooling the tool

12	25	75	12	10	151.120.25E
12,7	38	89	12,7	10	151.127.38E

TECHNICAL DETAILS:

- Premium quality HWM.
- Special positively ground cutting edge sharpening for excellent finish.

APPLICATION:

used for efficient contour cutting, end-trimming and panel sizing on glass fiber and fiberglass, phenolic and composite material.
For use on machining centres, point-to-point boring machines, CNC routers and hand-held routers equipped with chucks or adaptors.

DLCS CHROME COATING:

- Superb wear resistance
- Better chip clearance
- Superior cutting quality
- Less overheating
- More productivity

DLCS CHROME COATING
PROVIDES 3 TIMES LONGER LIFE THAN UNCOATED TOOLS!

Solid Surface & Fiberglass Bit with DLCS Chrome Coating - LONG LIFE

151 XTREME PERFORMANCE

D mm	I mm	L mm	S mm		ORDER NO. Right-hand rotation

12,7	38	89	12,7	10	151.127.38D

TECHNICAL DETAILS:

- Premium quality HWM.
- Special positively ground cutting edge sharpening for excellent finish.

APPLICATION:

used for efficient contour cutting, end-trimming and panel sizing on fiberglass, glass fiber phenolic and composite material. The 135° tooth geometry allows vertical feeding minimizing the bending of the workpiece. To be used on machining centres, point-to-point boring machines, CNC routers and hand-held routers equipped with chucks or adaptors.

DLCS CHROME COATING:

- Superb wear resistance
- Better chip clearance
- Superior cutting quality
- Less overheating
- More productivity

TECHNICAL DETAILS:

- Strength steel.
- Diamond cutting edges featuring 45° shear angle (H4).
- HW plunging tip for plunge cutting.
- Resharpenable cutters (max 8-9 times).
- Max feed speed 5 m/min.

APPLICATION:

for contour cutting and panel sizing on hard and abrasive materials such as laminates, MDF and melamine. For use on machining centers, point to point boring machines and CNC pantographs equipped with adaptors and chucks.

XTreme Plunge CNC Cutters with Insert Knives

653 XTREME

D mm	I mm	L mm	S mm	Box	ORDER NO.	Spare parts	
40	29,5	100	20	10	653.001.11	790.295.12	790.120.00

Spare parts: **990.075.00** M4x6mm TORX® screw
991.061.00 T15 TORX® key
990.036.00 M8x25mm TE screw
990.020.00 Hex nut for threaded arbors M8

TECHNICAL DETAILS:

- Strength steel.
- 4 cutting edges [Z2+2]

APPLICATION:

the new CNC cutter is designed with 2 plunging knives and two-sided knives fixed by special TORX® screws. It is ideal for direct plunge into the material and fast removal over a large surface area leaving an improved finish at the bottom of the cut. For cutting soft/hard wood, chipboard, melamine, MDF. For use on pantograph CNC machines.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

- 2 cutting edges [Z1+1].

APPLICATION:

straight router bits with on replaceable plunging knife and side knife fixed by a special TORX® screw. The tool bodies are precisely balanced. For finishing, routing, plunging and grooving on board materials (laminated chipboards and MDF) and hardwood. For use on portable routers or CNC machining centres.

CORRECT KNIFE POSITIONING

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Spoilboard Surfacing Router Cutters with Insert Knives

100	12	90	4	20x50	1	663.006.11	790.120.03*	990.075.00

Spare parts: **991.061.00** T15 TORX® key
990.036.00 M8x25mm TE screw (for 663.003.11 and 663.006.11)
990.020.00 Hex nut for threaded arbors M8 (for 663.003.11 and 663.006.11)

*Minimum 10 pieces or multiple

TECHNICAL DETAILS:

- Strength steel.
- 3 cutting edges [Z3].
- 4 cutting edges [Z4].

APPLICATION:

the new router bit for CNC routers is ideal for fast removal of material over a large surface area leaving an improved finish at the bottom of the cut. Used on soft and hardwood, particle board and MDF. The cutter uses 4-sided inserts in super micrograin carbide.

A cost effective solution compared to brazed router bits and solid carbide spiral bits.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

50,8	25,4	63,5	12,7	10	663.501.11		990.080.00

TECHNICAL DETAILS:

- Strength steel.
- 6 + 3 cutting edges [Z6+V3]

APPLICATION: this new router bit designed for CNC router machines and stationary router machine work centers are ideal for rabbeting joints and for quick chip removal on large surface areas and leaves a good finish at the bottom of the cut. Ideal for soft and hard wood, particle board and MDF. This bit is equipped with 4 sided insert knives in super micrograin carbide – an economical solution for brazed and solid carbide spiral bits.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

*Minimum 10 pieces or multiple

Universal Profile Cutter for CNC Machines

KNIVES NOT INCLUDED

663.301

D mm	I mm	L mm	S mm	Box	ORDER NO. Right-hand rotation
65	40-50	93	20	1	663.301.11

Spare parts: **692.999.01** 38x15x16mm wedge for cutter
990.064.00 M8x16mm STEI screw
991.064.00 Hex key 4mm

TECHNICAL DETAILS:

- Strength steel.
- 2 cutting edges [Z2] for knives 40x4mm and 50x4mm.

APPLICATION: for universal profiling of solid wood on CNC router machines. For cutting width 40mm and 50mm (serie **690**). Profile knives may only be ordered and used in pairs.

USEFUL TIPS: for enhanced safety, when using 50mm knives, it is recommended to carry out the cut in several passes.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Suggested MAX RPM 12.000

TO BE USED WITH SP KNIVES SERIES 690 (SEE PAGE 154~166)

- 790.395.12** 39,5x12x1,5mm knife (Minimum 10 pieces or multiple)
 - 663.999.01** 38x6x12mm wedge
 - 990.087.00** M6x8mm STEI screw (4x2mm threaded pin)
 - 991.067.00** 3mm hex key
 - 663.999.02** Kit with 2 wedges and 1 screw for blocking rotation
 - 990.099.00** M8x25mm TCEI screw
 - 990.023.00** M8 (4mm) nut
 - 991.081.00** 4mm "T" hex key

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

TECHNICAL DETAILS:

- Tool body in steel.
- 2 reversible HWM knives 39,5x12x1,5mm [Z2].
- Peripheral cutting on both sides.
- Adjustable swivelling blade (Rotates at 7,5° intervals; Precision = 7,5°).
- Swivelling range 0-45° towards top, and 0-90° towards bottom.

APPLICATION:

for jointing, rebating and chamfering of solid wood and wooden boards. Suitable for CNC router machines and stationary router machine with manual or mechanical feed. Never modify the chamfering angle whilst changing the knives. RH rotation.

CORRECT KNIFE POSITIONING

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

TECHNICAL DETAILS:

- Strength steel.
- 1 cutting edge [Z1]
- 2 cutting edges [Z2]

APPLICATION:

this innovative CNC router bit offers you an endless range of possibilities for V-Groove, miter folds, signmaking, lettering and chamfer edges. The tool mounts a high grade HWM reversible knife ideal for general purpose, chipboard and plywood, but knives with increased hardness are available for laminated and MDF material.

616.000.01

This unique system includes a tool body with 22 profile knives designed for multiple applications on your CNC routers. Ideal for MDF, laminates, veneers, plastic, wood and solid surface materials.

TECHNICAL DETAILS:

Knives 20x20x2mm.

We recommend re-sharpening the knives on profile cutting edge.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

Drawing is 1:1 scale

DESCRIPTION	S mm		ORDER NO. Right-hand rotation	Spare parts

REMARK: tool body and insert knives can be sold individually.

Complete Set for MDF Doors

615.004.01

Open some new doors with CMT. Our 4-piece set includes the most popular profile to make MDF panel doors for kitchens and bathrooms. Each bit is made from bar stock steel and is equipped with 5 different profile knives allowing enormous possibilities for easy and economical construction. The highest materials, the lowest tolerance in balancing and the precision in the sharpening of the knives let you obtain a smooth finish on your CNC machine.

SAFETY TIPS

The **TW-006** Torque Screwdriver is recommended for the proper fastening of screws (see page 413).

16	55	110	16	1	103.160.30

TECHNICAL DETAILS:

- Long-lasting cutter performance.
- 2 HL precision ground cutting edges [Z2].

APPLICATION:

for cutting deep mortise slots in soft and hardwood. For use on combination machining centres equipped with adaptors and/or chucks.

DESCRIPTION	Designed for heavy duty drilling in Large-Scale Industrial Manufacturing ensuring high impact resistance and greater durability.	Designed for heavy duty drilling in Large-Scale Industrial Manufacturing ensuring high impact resistance and greater durability.	Designed for heavy-duty to medium-duty drilling in large-scale to medium-scale industrial manufacturing ensuring high impact resistance and greater durability.	Designed for medium-duty to light-duty drilling in medium-scale to small-scale industrial manufacturing ensuring rigorous impact resistance and good durability.
USER	LARGE-SCALE INDUSTRIAL MANUFACTURING	LARGE-SCALE INDUSTRIAL MANUFACTURING	LARGE-SCALE TO MEDIUM-SCALE INDUSTRIAL MANUFACTURING	MEDIUM-SCALE TO SMALL-SCALE INDUSTRIAL MANUFACTURING
RECOMMENDED USE	INDUSTRIAL PRODUCTION	INDUSTRIAL PRODUCTION	INDUSTRIAL/CABINETMAKER'S	CABINETMAKER'S
MATERIALS	Ideal for chipboard, MDF, HDF and laminates. Nonprotruding center-point and spurs make this tool perfect for low-thickness panels.	Ideal for chipboard, MDF, HDF and laminates.	Excellent for both hard and soft wood. Great for chipboard, MDF, HDF and laminates.	Excellent for both hard and soft wood. Good for chipboard, MDF, and laminates.
SHARPENING & MAINTENANCE	Flat edges with reinforced spurs allow perfect finishing and prolonged drilling.  XTREME FLAT SHARPENING	Specially designed reinforced spurs allow for impeccable finishing during operations involving high-speed cutting feed.  XTREME SHARPENING	Specially designed reinforced spurs allow for impeccable finishing during operations involving high-speed cutting feed.  XTREME SHARPENING	Standard design with negatively ground spurs providing good quality finishing without chipping.  NEGATIVELY GROUND SPURS
CARBIDE	INDUSTRIAL CHROMIUM MICROGRAIN CARBIDE The premium quality carbide produces clean bores with no rough edges and maintains a balanced center point. In addition to its safety features, Chromium Micrograin Carbide guarantees exceptional resistance to fatigue and abrasion and allows for an infinite number of resharpenings.	INDUSTRIAL CHROMIUM MICROGRAIN CARBIDE The special chromium enhanced carbide produces clean bores with no rough edges and maintains a balanced center point. In addition to its safety features, Chromium Micrograin Carbide guarantees exceptional resistance to fatigue and abrasion and allows for an infinite number of resharpenings.	INDUSTRIAL SINTERHIP HI-DENSITY CARBIDE The unique tip is made of high quality carbide enhanced via Sinterhip (hot isostatic pressing). This process guarantees long lasting performance and exceptionally clean bores.	INDUSTRIAL GRADE CARBIDE Fine and medium grain carbide grade guarantee reliable prolonged use.
COATING	 SOLID TUNGSTEN CARBIDE	 SOLID TUNGSTEN CARBIDE	C.M.T. P.T.F.E. Coating provides a non-stick surface preventing resin, glue or sludge residue accumulation on the bit body. Baked at 420°, this unique industrial material is specifically designed to fit woodworking tool requirements.	C.M.T. P.T.F.E. Coating provides a non-stick surface preventing resin, glue or sludge residue accumulation on the bit body. 10	30	70	10x26	50	311.100.71	311.100.72

TECHNICAL DETAILS:

- Premium quality strength steel shank.
- High quality HWM body with mirror finishing.
- 2 cutting edges [Z2] + 2 curved ground spurs [V2].
- 2 spiral flutes.
- Parallel shank with driving flat and adjustable screw length.
- Recommended feed speed 1~4m/minute - RPM 6000.

APPLICATION:

ideal for chipboard, MDF, HDF and laminates.
No center-point or spurs means perfect bores in low-thickness panels.
For use on boring machines equipped with adaptors/chucks.

CMT's new high quality dowel drills guarantee excellent performance and extra-long life!

Flat sharpening with no center-point or spurs

5	25	57,5	10x25	50	382.5057
5	35	70	10x25	50	382.5070

TECHNICAL DETAILS:

- Premium quality strength steel shank.
- High quality HWM body.
- 1 cutting edge [Z1].
- Parallel shank with driving flat and adjustable screw length.

APPLICATION:

for drilling blind holes in solid wood, wood derivatives, plastic, laminates and melamine.
For use on boring machine, point-to-point machines and hand-held routers equipped with adaptors and/or chucks.

SECURITY TIPS:
These boring bits require more power compared to tradition dowel drills.
The number of boring bits to be used in a single drilling unit depends on the machine power.

TECHNICAL DETAILS:

- High quality HWM body.
- 2 cutting edges [Z2] at 120°.
- 2 spiral flutes.

APPLICATION:

for drilling through holes in solid wood, wood derivatives and laminates.
For use on boring machines equipped with adaptors and/or chucks.

Solid Carbide Twist Drills "V" Point 60° - LONG LIFE SHARPENING

For use with the following items: **364-365**

TECHNICAL DETAILS:

- High quality HWM body.
- 2 cutting edges [Z2] at 60°.
- 2 spiral flutes.

APPLICATION:

for drilling through holes in solid wood, wood derivatives and laminates.
For use on boring machines equipped with adaptors and/or chucks.

For use with the following items: **364-365**

TECHNICAL DETAILS:

- High quality HWM body.
- 2 cutting edges [Z2] + 2 curved ground spurs [V2].
- 2 spiral flutes.

APPLICATION:

for drilling blind holes in solid wood, wood derivatives and laminates.
For use on boring machines equipped with adaptors and/or chucks.

TECHNICAL DETAILS:

- Strength steel.
- Precision grinding on all contact surfaces.
- Quick and secure assembly of the twist drills with screw.
- Parallel shank with driving flat.

APPLICATION:

for use with twist drills with common shank and bushing diameter.
For use on boring machines equipped with adaptors and/or chucks.

10	20	70	10	10	377.102.11	377.102.12

TECHNICAL DETAILS:

- Premium quality strength steel body.
- High quality HW tip.
- 2 cutting edges [Z2] + 2 negatively ground spurs [V2].
- 2 spiral flutes.
- Balanced centre point.
- 2 countersink cutting edges at 45°.
- Orange or black P.T.F.E. coating.
- Parallel shank with driving flat and length adjusting screw.

APPLICATION:

for drilling and countersinking in solid wood, wood derivatives and laminates.
For use on boring machine equipped with adaptors and/or chucks.

RECOMMENDED USE	INDUSTRIAL PRODUCTION	INDUSTRIAL PRODUCTION	INDUSTRIAL/REMODELER	INDUSTRIAL/REMODELER
MATERIALS	Ideal for chipboard, MDF, HDF, laminates and abrasive panels in which long service life is imperative.	Ideal for chipboard, MDF, HDF and laminates. Non-protruding center-point and spurs make this tool perfect for low-thickness panels.	Excellent for solid wood. Good for chipboard, MDF, HDF and laminates.	Excellent for solid wood. Good for chipboard, MDF, HDF and laminates.
SHARPENING & MAINTENANCE	NEGATIVELY GROUND SPURS: standard design HW head featuring precision balanced centre point. 2 HW precision ground cutting edges and 2 negatively ground spurs.	XTREME FLAT SHARPENING: flat edges with reinforced spurs allow perfect finishing and prolonged drilling at high-speed cutting feed.	NEGATIVELY GROUND SPURS: standard design HW head featuring precision balanced centre point. 2 HW precision ground cutting edges with chipbreaker and 2 negatively ground spurs.	NEGATIVELY GROUND SPURS: standard design HW head featuring precision balanced centre point. 2 HW precision ground cutting edges with chipbreaker and 2 negatively ground spurs.
DIAMOND/CARBIDE	The special polycrystalline diamond formula increases tool life up to 20 times longer than HW hinge bits. Good number of resharpenings guaranteed. The best quality/price ratio	INDUSTRIAL CHROMIUM MICROGRAIN CARBIDE Special chromium enhanced carbide produces clean bores with no rough edges even in corners. Chromium Micrograin Carbide guarantees exceptional resistance to fatigue and abrasion for longer lifetime.	INDUSTRIAL GRADE CARBIDE Fine and medium grain carbide grade guarantee reliable prolonged use.	INDUSTRIAL GRADE CARBIDE Fine and medium grain carbide grade guarantee reliable prolonged use.
COATING	High-quality nickel-plated with anti-friction and anti-corrosion properties.	C.M.T. P.T.F.E. coating provides a non-stick surface preventing resin, glue or sludge residue accumulation on the bit body. Baked at 420°, this unique industrial material is specifically designed to fit woodworking tool requirements.	C.M.T. 45	70	10x26		10	369.450.11C	369.450.12C

TECHNICAL DETAILS:

- Premium quality strength steel.
- Balanced centre point 1mm.
- 2 ground cutting edges with chipbreaker [Z2R] + 2 negatively ground spurs [V2].
- Orange or black P.T.F.E. coating.
- Parallel shank with driving flat and length adjusting screw.

APPLICATION:

use for drilling accurate and clean-cut blind holes in wood composites, plastic and laminated materials.
Ideal for hinges. For use on boring machine equipped with adaptors and/or chucks.

New construction with 1mm centre point

- HW balanced centre point.
- 2 HW ground cutting edges [Z2].
- 2 HW negatively ground spurs [V2].
- **Parallel shank.**

APPLICATION:

for drilling blind holes in solid wood, wood derivatives and laminate materials.

Ideal for hinges.

5 Piece Boring Bit Set for Hinges

512.001.01

HW Z2 V2 RH

The perfect set for hinge work and other related applications. Machined from special high speed steel and featuring tungsten carbide tipped cutting edges.

TECHNICAL DETAILS:

- Strength steel.
- HW balanced centre point.
- 2 HW ground cutting edges [Z2].
- 2 HW negatively ground spurs [V2].
- **Parallel shank.**

APPLICATION:

for drilling blind holes in solid wood, wood derivatives and laminated materials.

Ideal for hinges.

It's tough to beat the old faithful mortise and tenon joint for strength and accuracy, even with all the other joinery options in the world of woodworking. It isn't the easiest joint to make, but it surely helps to have the best quality tools in your shop. That's why we've added a new selection of chisel and bit sets in all the popular sizes 6,35mm (1/4") to 19mm (3/4") diameter.

These sets are for use on any standard drill press mortising attachment of mortising machines.

TECHNICAL DETAILS:

- Dependable DIYer tools. Great quality/price ratio.
- SP steel.
- SP balanced centre point.
- 2 SP precision ground cutting edges [Z2].
- 2 SP ground spurs [V2].
- Parallel shank.

APPLICATION:

for drilling flat bottom holes of any size in softwood. Create oval and arched openings at any angle. Create niches for the installation of brackets/straps, frames/grids.

Forstner Bit Sets

We offer a wide range of Forstner bits in the most popular diameters to execute holes for brackets/straps in softwood. Drill ovals and arched openings at any angle for the installation of hinge parts. Available in 4, 5, 7, 12 and 16 bit sets.

Dependable DIYer tools. Great quality/price ratio.

Spare parts: 991.060.00 2mm hex key

TECHNICAL DETAILS:

- Strength steel.
- Countersink: 2 carbide tipped cutting edges [Z2] at 45°.
- Fastening screw for quick and easy drill bit change.

APPLICATION:

for use with spiral bits featuring a parallel shank of equal dimension to countersink shank diameter.

90° Countersink with Parallel Shank

TECHNICAL DETAILS:

- SP steel.
- Countersink: 1 SP cutting edge [Z1].
- HSS drill bit.

APPLICATION:

for drilling blind holes in soft and hardwood.

CMT XTREME FAST AND PUSH&LOCK SYSTEMS: NEXT GENERATION HOLE SAW

These hole saws, equipped with the new **XTREME FAST** system, have been improved to ensure maximum productivity, lifetime and unbeatable performance in all materials. The innovative patented **PUSH&LOCK** system makes the traditional hole saw arbor obsolete.

NEW FEATURES: 1. One **PUSH&LOCK** arbor for all Hole Saw Series & Diameters. 2. Change your Hole Saw, with a simple **PUSH&LOCK**. 3. Release Plug with a push. 4. Enlarge the existing hole.

SERIES 550X: MULTI-PURPOSE

MATERIALS

 WOOD/PLYWOOD	 MDF/LAMINATES	 PLASTERBOARD
 PLASTICS	 BRICKS AERATED CONCRETE	 SOFT TILES

SERIES 551X: BI-METAL PLUS

MATERIALS

 STAINLESS STEEL	 CAST IRON	 STEEL
 ALUMINIUM	 COPPER/BRASS	 PLASTICS

SERIES 552: DIAMOND DRY

MATERIALS

 HARD TILES	 HARD STONES	 ARTIFICIAL STONES

CMT XTREME FAST AND PUSH&LOCK SYSTEMS: NEXT GENERATION HOLE SAW

XTREME
FAST

PUSH
& LOCK

1. One PUSH&LOCK arbor for all Hole Saw Series & Diameters

2. Change your Hole Saw with a simple PUSH&LOCK

3. Release Plug with a push

4. Enlarge the existing hole (Use adaptor set 550-PA05)

XTREME FAST & FASTX4 COMPATIBILITY (NEW & PREVIOUS SYSTEM)

Do you already have a CMT Hole Saw with the previous FASTX4 System? **NO PROBLEM, IT'S STILL GOOD TO GO!**

- 1.** Carefully and firmly secure your FAST4X Hole Saw. This will prevent damage to the tool and bodily injury while handling.
- 2.** Unscrew the adaptor attached to your previous FASTX4 Hole Saw.

- 3.** Replace the previous FASTX4 adaptor with the new XTREME FAST adaptor.

- 4.** Carefully tighten the new adaptor to the Hole Saw with a 13mm spanner.

- 5.** Your Hole Saw is now compatible with the new **PUSH & LOCK** **PUSH&LOCK** System. **YOU'RE GOOD TO GO!**

One **PUSH&LOCK** arbor for all Hole Saw Series & Diameters 

550-PH85

PUSH&LOCK arbor for **XTREME FAST** system, shank **HEX8.5mm** (11/32").
Compatible with chucks $\leq 25/64"$ (10mm).
HSS pilot drill (**550-PD02** included)

Suitable for Series:

550-PH11

PUSH&LOCK arbor for **XTREME FAST** system, shank **HEX11mm** (7/16").
Compatible with chucks $\leq 1/2"$ (13mm). **HEAVY DUTY**.
HSS pilot drill (**550-PD02** included)

Suitable for Series:

550-PHSD

PUSH&LOCK arbor for **XTREME FAST** system, shank **SDS PLUS**.
Compatible with **SDS PLUS** power tools.
HSS pilot drill (**550-PD02** included)

Suitable for Series:

550-PD01

HW Pilot drill for **PUSH&LOCK** arbor, $\varnothing 7\text{mm}$ (17/64"), L=125mm (4-15/16").

Suitable for Series:

MATERIALS

XTREME FAST system is compatible with all Hole Saw Series & Diameters **XTREME FAST**

550-PA01 (3pcs.)

XTREME FAST Adaptor 1/2"-20 for hole saw Ø16~30mm (5/8"~1-3/16")

Suitable for Series:

Ø16~30mm
(5/8"~1-3/16")

550-PA02 (3pcs.)

XTREME FAST Adaptor 5/8"-18 for hole saw Ø32~150mm (1-1/4"~5-29/32")

Suitable for Series:

Ø32~150mm
(1-1/4"~5-29/32")

550-PA03 (3pcs.)

XTREME FAST Adaptor 5/8"-18 for hole saw ≥Ø152mm (6")

Suitable for Series:

≥Ø152mm
(6")

550-PA04 (3pcs.)

XTREME FAST Adaptor M14 for hole saw series 552-5

Suitable for Series:

*Pilot drill of PUSH&LOCK arbor must be disassembled during use with this series

550-PA05 KIT FOR ENLARGMENT EXISTING HOLE (3pcs. LONG SPINDLE)

Suitable for Series:

Example of assembly for existing hole enlargement

550-PA06 STARTER KIT (1pc. 550-PH85, 2pcs. 550-PA01, 3pcs. 550-PA02)

1 550-PH85
PCS

SECURED TOOTH TECHNOLOGY

Thanks to advanced technology, cutting teeth are securely anchored to body, which means they stand up better to hard materials and breakage.

FASTER 5X **10X LONGER LIFE**

CONSTRUCTION CARBIDE

Specially formulated construction carbide, used for cutting teeth provide 10X times longer cutting life and performs 5X faster than the standard hole saw.

MATERIALS

SPEED KILLS!

Operating at higher speeds than those indicated will shorten hole saw life and produce poor quality holes.

PRE-BORE:

For best results, always pre-bore with the pilot drill only.

NEVER USE HAMMER MECHANISM WITH THESE HOLESAWS!

APPLICATIONS: examples on wood, brick, plastic.

Multi-Purpose Hole Saws

*SUGGESTED RPM

APPLICATIONS
electric flush-mount case installation.

Example of commercial electric flush-mount boxes

mm	D inches	Z	WOOD/PLYWOOD RPM*	MDF/LAMINATES RPM*	PLASTERBOARD RPM*	PLASTICS RPM*	BRICK/AERATED CONCRETE RPM*	SOFT TILES RPM*		ORDER NO.
68 - 73	2-11/16 - 2-7/8	3+3	600	600	600	600	200	100	10	550-068CSX

TOOTH DESIGN

Special tooth geometry with variable pitch (4~6 TPI) provides a smoother cut and better chip clearance preventing clogging and heat build-up. Teeth are alternate & side set to minimize binding and friction therefore requiring less feed pressure.

ALTERNATE & SIDE SET TEETH VARIABLE PITCH (4~6 TPI)

BI-METAL 8% COBALT

Teeth made with Bi-metal 8% Cobalt provide extreme results. Superior performance and 2X longer cutting life than the standard hole saw.

MATERIALS

COOLING LUBRICANT:

When drilling metals, lubrication serves several purposes:

- it cools the saw and workpiece
- it reduces heat and abrasion which shortens cutting life
- it helps remove swarf from the cutting surface
- it extends hole saw life by 500%.

SPEED KILLS!

Operating at higher speeds than those indicated will shorten hole saw life and produce poor quality holes.

FEED PRESSURE:

Always consider materials in use and project type. Apply sufficient feed pressure to aid proper chip removal. Reduce the pressure when hole saw becomes hot or if teeth start to clog. Insufficient feed pressure will lead to premature tooth dulling. Too much pressure will damage teeth.

PRE-BORE:

For best results, always pre-bore with the pilot drill only.

NEVER USE HAMMER MECHANISM WITH THESE HOLESAWS!

APPLICATIONS: examples on steel, sandwich material.

Diamond Dry Hole Saws

Diamond dry hole saws with continuous edge have been specially developed for professionals that need to drill in extremely tough materials like **HARD TILES (ceramic, gres, etc.)**, **HARD STONES (granite, marble, etc.)**, **ARTIFICIAL STONES (OKITE®, SILESTONE®, etc.)**, in which it is increasingly difficult to drill with conventional hole saws. Drilling other masonry materials is also possible, but it will reduce tool life. These hole saws guarantee excellent performance and superior lifetime!

552

MATERIALS

DIAMOND GRIT
Diamond grit featuring strong cubo-octahe-dral inclusion-free heat-resistant crystals, guarantees fast clean cutting and longer cutting life than the standard hole saw.

PACK QTY. 10 pcs.

552 RECOMMENDATIONS FOR USE:

Turn on drill to start tool rotation. Begin drilling at a 30° angle - this is the angle measured between the hole saw and the working surface. Cutting at an angle will prevent tool from slipping and facilitate precision centering. To improve stability during operation, use the working surface as leverage by resting the drill against it.

Continue the cut vertically, accompanying the tool in an orbital motion. This will favor better cooling and chip evacuation. (If you are using a guide, begin the cut vertically, then lift the guide and continue cutting in an orbital motion).

Remember, the hole saw is not a drill bit. Attempting to bore holes perpendicular to the work surface on a frequent basis will drastically reduce tool lifespan.

Using water as a cooling agent may help extend the life of the hole saw.

RPM SUGGESTED? High RPM values reduce the possibility of damaging/burning the diamond edge, ensuring a longer life.

NEVER USE HAMMER MECHANISM WITH THESE HOLESAWS!

Professional Router Table

999.110.00

CE Compliant

CMT7E+PRO

Our quality bits have been designed for you, the professional craftsman, to allow you to confidently work at your best. CMT now offers even more possibilities with our professional router table: the perfect place to combine your skills and CMT quality. The professional router table system has a strong and sturdy MDF laminate work surface measuring 80x60x2,5cm for easy mobility when working. This free standing table sits at a comfortable height of 90cm on solid high gauge steel legs and weighs 26,5 Kg. The plate is already pre-bored for CMT routers **CMT7E** but is adaptable to all brands and models of routers on the market. Plate can also fit any router bit up to 98mm in diameter. Choose from our wide range of bits, including multi profile and molding bits or even kitchen bit set. Work easily and safely on this table!

Optional

999.100.11
Electric Safety Switch
(Mandatory for CE Compliance)

Small Stock Holder

By far, handling small stock on your router table is probably one of the most difficult challenges any professional woodworker has to face! Keeping all ten fingers attached to your hands is definitely a priority. This is why the CMT Small Stock Holder is an absolute necessity in the workshop! It safely ensures proper stabilization of smaller work pieces throughout the routing process. The handle grips fitted with comfy silicone inserts keep fingers and hands a safe distance from the blade while the anti-slip lining on both the center and right side base prevents slippage and ensures your work-piece stays put! Fully adjustable and easy to control, the CMT Small Stock Holder can manage small stock up to **216mm. (8-1/2")** in width. The perfect little jig for detail-oriented jobs!

PTC-1

DESCRIPTION	ORDER NO.
Small Stock Holder	PTC-1

1. Lie the Small Stock Holder flat on the work surface. Slide the Hold Down Pins [F] to the top of the slotted holes. Insert the small stock piece between the Adjustable Centre [C] and Left-Side Bases [B]. The end of your small stock piece should lie flat and snugly up against the Left-Side Base. The end must also extend outwards in front of the Small Stock Holder a minimum distance of half the diameter of the router bit in use.

2. Press the Quick Release Button [E]. Slide the Adjustable Centre Base [C] over until it fits snugly against the small stock piece. Release the Quick Release Button. In the image, a "sacrificial piece" is being used to prevent "tear-out". Loosen Hold Down Pins [F] with the Hex Key Wrench provided. Slide Hold Down Pins down until resting firmly against the small stock piece. Tighten pins with Hex Wrench. Rotate Centre Base Knob [H] to further secure your small stock piece.

3. Adjust the height of your router bit. When you're ready, power on your router. Take hold of the Small Stock Holder Handles [A], slowly feed your small stock piece into the router opposite to the router bit rotation and always in contact with the router bit bearing guide. When finished routing, press the Quick Release Button [E] and slide the Adjustable Centre Base [C] over so you can remove the small stock piece.

4. Need to rout stock thicker than the Small Stock Holder? Follow setup instructions carefully. Create an "outrigger" - cut a piece of stock, which will act as a stabilizer, the same thickness as the piece you are working on. Attach the "outrigger" securely to the Right-Side Base [D] using pan-head screws (not included) that will fit through the slotted holes. In this way, your work piece and the Small Stock Holder will remain stable during the routing process.

Pocket-Pro Joinery System

PPJ-002

For fast, easy and accurate cabinet & furniture construction. Designed by CMT and professional cabinetmakers, this new system allows you to make rock-solid pocket hole joints in stock 12,7mm (1/2") to 41,3mm (1-5/8") thick with unprecedented speed and accuracy.

The heart of the Pocket-Pro System is our unique moulded jig, which features hardened drill bushings and an interlocking two-piece design. Sliding the jig up or down enables you to adjust the stock thickness in preset 1,6mm (1/16") increments without test joints or measurements! If you have used other pocket hole jigs you will be familiar with many joint applications, but you will benefit from many Pocket-Pro System advantages.

For example:

- some jigs require adding or removing various parts of the jig to join different stock thicknesses. With the Pocket-Pro System you simply have to adjust the interlocking jig up or down for the full range of joints 12,7mm (1/2") to 41,3mm (1-5/8") thick;
- other jigs require frequent repositioning of the depth stop collar for different joint styles. CMT's Pocket-Pro Joinery System allows you to make most of the adjustments leaving the stop collar in the same position of the drill bit;
- plus, with CMT's Pocket-Pro System you can quickly adjust the location of the pocket in relation to the end of your workpiece to create a stronger joint by using longer screws, or to leave more "meat" in the joint.

Check out the Pocket-Pro Joinery System today. Easy enough for beginners and accurate enough for professional workers, it is the world's most versatile pocket hole jig.

Professional Straight Edge Clamps

Used as a fence for your bandsaw, drill press or even as an auxiliary fence on your router table or table saw, CMT's professional straight edge clamps represent a two-in-one tool, allowing you to either use them as an edge guide, or to easily clamp your boards or any object for woodworking. Available in different sizes. Here are the main features:

- Made of extruded aluminium for easy carriage and enhanced durability.
- Light, yet more rigid than any other clamps on the market.
- Measuring scales, low-profile jaws, built-in T-tracks on the top allowing the use of accessories or jigs.
- Either single or back-to-back clamps.

Low-profile clamps allow for accurate cuts, dados and grooves. In addition they properly work as an auxiliary fence on your drill press or router table. Sturdy jaws hold your workpiece to the full length of the clamp without any side-to-side play. Back-to-back clamps with the suitable accessories also let you manage your woodworking operations with a lot of versatility. Adjustable scale and two T-tracks allow you to use many accessories.

DESCRIPTION	ORDER NO.
Professional Straight Edge Clamp 610mm	PGC-24
Professional Straight Edge Clamp 915mm	PGC-36
Professional Straight Edge Clamp 1270mm	PGC-50

Back-to-Back Connectors for Straight Edge Clamps (optional)

Lay two more straight edge clamps on the back of the other pair of straight edge clamps and secure them by using your back-to-back connectors.

Fasten the bottom jaw pads to the table top and clamp wood with the top jaw pads. Thanks to the low profile jaws your work surface is never obstructed.

The back-to-back straight edge clamps can also be taken apart for making two separate clamps.

DESCRIPTION	ORDER NO.
Back to Back Connectors for straight edge clamps (8 Pieces)	PGC-B2B

Adjustable Precision Router Dado Jig

The perfect tool for crafting grooves, dadoes, and joints. Easy to use and fully adjustable. You can create dadoes of any size using the same router by simply increasing the number of passes you make. Sturdy construction built to last. Smooth rolling steel rollers are ideal for easy maneuverability and stress-free handling. Compatible with almost any router equipped with 1-3/16" (30mm) bushings or by using the Bushing Template Guides included. (bore baseplate sold separately). Guarantees clean precise dadoes.

FITS THE MOST POPULAR ROUTERS

Prepare your router: Install the guide bushing rings into the bore baseplate and then attach it as the base for your router. Select and insert your router bit.

Prepare the Adjustable Guide Rail & Straight Edge Clamp: Position both the adjustable straight edge clamp and then the adjustable precision router dado jig onto your workpiece. Then using the adjustable thumb screws, secure it. Once assembled, ensure that the adjustable precision dado jig slides freely.

Insert your router into the center hole of the adjustable precision router dado jig.

Set your cutting depth by raising or lowering the bit until desired depth is reached. Determine the starting point of the cut you wish to make by using the Dado Alignment Marks on the long sides (width) of the Adjustable Precision Router Dado Jig which indicates the outside edge of the dado cut closest to the straight edge clamp (12-10-8mm front, 1/2", 3/8", 1/4" back).

Holding onto your router in position, power on and begin making the cut by pushing forward and back on the straight edge clamp using the precision router dado jig as a guide. Makes impeccable grooves and dadoes along the length of your workpiece.

For creating dadoes that exceed router width, using the adjustable gauge, simply select the desired width on the graduated scale.

Make as many passes necessary to obtain the desired dado width.

RECOMMENDED* (not included)

- Universal Router Base **899.000.01** or
- 899.000.02** Prebored base for **CMT7E/CMT8E**

*Not required for routers with 30mm (1-3/16") bushing guide

RECOMMENDED (not included)

- PGC** Straight Edge Clamp with graduated scale (pag. 400)

Flexible Templates for Curved & Arched Routing

The CMT flexible template is easy to screw on any kind of wooden panels, MDF or chipboard for creating forms, arcs and curved elements easily and rapidly. In order to fix your template you can use countersunk screws, which are widely available on the market. The CMT template is made of a highly-resistant flexible plastic, which can be tied in knots without any risk of ruining or reducing flexibility.

Screw your template to the edge of the panel and follow its shape and rout the border on the guide ring. The template is suitable for manual feed on routers, router tables and spindle moulders. Rout easily, safely and accurately to make multiple forms such as arcs, curved elements and cut-out forms. Mark the edge of your form precisely and screw it onto a previously-placed panel from underneath.

If you rout with a guide ring mounted onto your spindle moulder, keep your hands a safe distance behind the template. Two different profiles in three lengths are available. Please notice that the smallest profile features a short radius, whereas the larger profile features a larger opening in case of flat and long curves.

- Special plastic without any plasticizer.
- Made in Germany.
- Lasts more than 10 years!

12 Corner Radius Router Template Set from 3mm to 25mm

Our useful 3-piece corner radius template set includes 8mm thick acrylic templates that will allow you to make 12 different radii (4 per template) by using a flush trim or a pattern bit (sold separately). Included with the templates you will also find 4 alignment pins and 4 wood screws.

Use the pins to align the template onto your workpiece, then use the four wood screws provided to secure it. Remove the alignment pins and use the bit to cut the corner of your workpiece to the same radius as the template.

TYPE OF SHAPE

Adjustable Corner Frame Clamps

CMT Adjustable Corner Frame Clamps will easily create the perfect 90° angle or handy T-joints typical in shelving, cabinets and frame applications using boards of variable thicknesses from 6 to 25.4 mm. These clamps allow you to work independently, and above all, hands-free so you can glue, dry-fit, nail, screw, or square your joint securely and accurately - just like a professional. The special design allows you to immobilize the panels from the inside (hex key) and from the outside (knob) according to your project needs. Set up is easy as 1-2-3: position the clamp, twist the knob and presto! Equal pressure is instantly applied on each side of the corner and you have a perfectly squared 90° joint! Made of sturdy and durable plastic material, the clamp features a double graduated scale in mm/inches for a broad range of adjustments.

Universal Dovetail Jig

Dovetail joints give a touch of craftsmanship to your work, but many woodworkers avoid these joints, because of their apparent complexity. CMT's new 305mm dovetail jig is the fast easy solution! Thanks to precise templates, permanent stops and easy adjustments, we have taken the "tinkering" out of dovetail joinery. Simply clamp your workpiece in with the edges against the factory-set stops, set your bit depth and then you are ready to rout. Rest assured, we haven't cut corners on quality either. This jig features a rugged steel body, templates, stops and clamping bars that together produce perfect long-lasting joints for all your woodworking needs. The jig accepts stock from 11mm to 25mm in thickness and is capable of crafting a variety of joints with the available templates. The jig comes with a template for 12.7mm half blind joints as well as a template guide. Optional templates are available for through dovetail and box joints.

Inlay Kit

The components of this kit include a spiral cutter or a straight cutter (sold separately) with a diameter of 3mm and 3.2mm and a 6mm and 6.35mm attachment respectively. The interchangeable brass rings allow you to create the cavity of your choice on the workpiece. The instruction manual shows in detail all the steps of the process. This kit offers endless decorative possibilities (toys, puzzles and lettering). The spiral cutter is recommended for use on MDF while the straight cutter is best for natural wood.

Kitchen Worktop Jig	CMT650

CMT650 is designed for Ø12mm straight bits.

- Template made of stable and hardened material.
- For 90° and 45° joints
- Integrated templates for rounding over and chamfering edges.
- Extra guide bush for worktop width of 600mm.
- Two integrated templates for panel bolt recesses.
- Delivered with a clear and comprehensive instruction manual.

Universal Boring Template

CMT's Universal Boring Template has been designed for carrying out precise and productive manual dowelling of furniture elements by using 32mm Euro-System screws. For boring shelf supports with 3mm or 5mm diameter and for making and marking hinge holes. This **CMT900** template will help you prebore the most popular hinge types.

Check out the **CMT900** on

For dowelling into surfaces and shelf supports and hinges

- Laminated phenolic material
- Clear and comprehensible template marking
- Precise end stops

BORING ADAPTORS (not included):

- Suitable for any type of drilling machine
- End stop for different boring depths
- DURALUMIN® body with pre-bored holes for better chip ejection
- Precise, flat seating for proper alignment

3 EASY STEPS IN CREATING DOWEL JOINTS

Place the jig onto the board, fix the end stop and tighten the workpiece. Set the bore depth and clamp the boring adaptor on your drilling machine. Bore vertical holes.

Fasten the jig on the other element, fix the end stop and set the bore depth. Bore horizontal holes.

Now insert the dowels with glue into the holes and join both elements.

As an alternative, use through hole bits and screw the elements together.

For use on boring and point-to-point machines

Adjustable Torque Screwdriver Set 1~6 Nm

The Adjustable Torque Screwdriver set includes 20 types of inserts and provides a sturdy protective case to store and keep tools safe. In addition to the instruction manual, inside you'll find the calibration certificate (unique for each instrument) according to DIN ISO 6789 & ASME B107.300-2010.

TW-006

Standard Equipment

- Torque screwdriver
 - 20 types of inserts:
 - Plastic case
 - Instruction manual
 - Calibration certificate
- ⊕ 0-1-2-3 (n°4 pcs)
 - ⊖ 8-9-15-20-25 (n°5 pcs)
 - ☆ 3-4-5-6 (n°4 pcs)
 - ⊕ 1,5-2-3-4-5-6 (n°6 pcs)
 - + Square Adaptor 1/4" (6,35mm), n°1 pc

TECHNICAL DETAILS:

- Range..... 1~6 Nm
- Resolution..... 0.1 Nm
- Tolerance..... ±6%
- Length..... 195mm (7.7")
- Weight..... 335gr. (11.8oz)
- Automatic quick-release, audible and palpable click, when selected torque is reached
- Automatic reset after 90°
- Right-handed (CW)

TORQUE SUGGESTED*

THREAD	Nm
M2,5	1,0
M3	1,2
1/8"	1,4
M3,5	1,8
M4	2,7
M5	5,3

* Suggested tightening torque for CMT screws (Class 8.8)

APPLICATION:

The Adjustable Torque Screwdriver is versatile enough for use in many fields, but we recommend it for the tightening or fastening of CMT bits and cutter heads with interchangeable knives. Some CMT products may require the use of an extension, which is not included in the TW-006 set.

3D Router Carver System

Exclusively from your CMT distributor

RCS

Turn your router into a remarkable carving tool. It's fast, easy, and a whole lot of fun!

Who says that intricate woodcarving requires an artist's touch? Thanks to the patented 3D Router Carver system, anyone with a plunge router can create any of the beautiful designs shown on these pages in just minutes. Decorate doors, drawers, cabinets, furniture or just about any flat wooden surface with one or more of these designs. How does it work? The secret is in the 3D Router Carver Bit and the way that bit interacts with the carving templates. The V-Groove router bit is enclosed in a 45° cone-shaped guide. You rout with the plunge mechanism of your router unlocked, allowing the bit to move up or down as the router moves forward. As the slot in the template get wider, the bit moves down, producing a wider, deeper V-groove. As the slot gets narrower, the bit moves up, and the groove gets narrower and shallower. It sounds simple, and it is! (that's why the system is patented worldwide). Please see the illustrations below for more details on the carving technique. You'll receive complete instructions with your 3D Carver templates. For an informative visual demonstration, check out the 3D Router Carver video on our web site.

What do you need to get started?

- The 3D Router Carver bit
- The Carver template of your choice
- The Holding frame to match your template
- Your plunge router

Check out
3D Router Carver System on

(Note: Be sure the opening at the base of your router is at least 47,6mm in diameter. If it isn't, you'll need to make a sub-base to accept the large diameter of the 3D Carver bit.)

3D Router Carver Bit & Sleeve

S mm	ORDER NO. Right-hand rotation	Spare parts						Optional
8	RCS-BIT8	RCS-CUT8	RCS-SLE8	RCS-SHIELD		RCS-NUT8	991.007.00	RCS-SLEEVE8
12,7	RCS-BIT	RCS-CUT		RCS-SHIELD	990.091.00		990.092.00	

Here's how it works:

1. Clamp or tack the holding frame to your workpiece

2. Drop the template into the center of the frame

3. Plunge the bit into a wide part of the slot and rout with the router's plunge mechanism unlocked.

Allow the plunge mechanism to move up and down as you advance.
Wider template slots allow wider, deeper grooves.
Narrower slots produce shallower grooves.

4. With the frame still in place, flip the template & rout again. Some templates will be routed 2 to 4 times, depending on the complexity of the design.

5. Remove the frame and you're finished!

CABINET DOOR & PANEL CARVINGS

These designs are ideal for the doors or panels of cabinets, entertainment centers, fireplace surrounds or almost any flat surface. See the designs below for complementary patterns for drawers, rails and corners. Approximate carving time is 5 minutes.

DESCRIPTION	CARVING DIMENSIONS mm	NO. OF TEMPLATES	ORDER NO.
Classical cabinet door - A	440 x 185	2	RCS-302
Florentine cabinet door - B	415 x 170	2	RCS-304
Cascade cabinet door - C	365 x 210	1	RCS-305
Roma cabinet door - D	375 x 200	1	RCS-306
Fleur-de-Lys door - E	250 x 180	4	RCS-805
Spanish fan template - F	380 x 200	2	RCS-806
Cabinet door holding frame			RCS-003

TIP: Many carvings, like the Florentine rail, are enhanced with the addition of a rosette.

PANEL & RAIL CARVINGS

With a long, horizontal shape, these designs are perfect for door rails, headboards, cabinet face frames and valences. Approximate carving time is 4 minutes.

DESCRIPTION	CARVING DIMENSIONS mm	NO. OF TEMPLATES	ORDER NO.
Classical Rail - A	550 x 120	2	RCS-402
Florentine Rail - B	550 x 130	2	RCS-404

Bowl & Tray System

BTS-002

CMT System **BTS-002** provides a fun and easy way for you to make divided bowls and trays in your shop. No lathe? No problem. This bowl making technique uses a router and CMT's unique bowl and tray router bit. The resulting bowls and trays are beautiful. This kit also provides an excellent way to use up scrap wood. Glue pieces together, butcher block style, to make a beautiful pattern of colors and species.

The templates will withstand a lifetime of use and can be used to make a variety of bowl or tray styles. The collet extension, used to make extra deep bowls, is also useful whenever your general woodworking requires extra deep cuts.

TMP-011
MDF Template

TMP-012
MDF Template

Trace the templates onto the bowl blank.

Rough out the interior using a drill press and a 50,8mm Forstner bit.

Rout the interior to final shape using the bowl and tray router bit and collet extension.

Bandsaw the exterior to final shape.

Digital Height Gauge

DHG-001

- Precise measurements for router bits, saw blades, band saw blades, cutter heads, drill bits, holes depth.
- Measuring ruler with Metric/Imperial scale and locking screw.
- Horizontal & vertical measuring.
- Digital easy-to-read display.
- Self-standing with magnets, for setting cutting depth on router tables and low profiles for backfence adjustment.
- Instruction manual.

TECHNICAL DETAILS:

- Measuring range:Scale: 0~80mm (0~3-1/8");
- Needle:0~50mm (0~2")
- Wide opening:60mm (2-23/64")
- Resolution:0.05mm (0.002")
- Accuracy:±0.1mm (±0.004")
- Battery:**Included**
- Battery Type:CR2032-3V; Lithium Button Cell

DESCRIPTION	BOXES	ORDER NO.
Digital Height Gauge	8	DHG-001

Place your gauge on a flat surface and set to "0" on the display.

Position your gauge on the desired position.

Insert needle and set to "0".

Digital Moisture Meter

DMM-001

Ideal for use in woodworking, building construction and agriculture industries. The **DMM-001** is also an invaluable tool in the restoration field. Ideal for locating moisture in carpets and sub-flooring. Ultra-sensitive Digital Moisture Meter easily detects hidden leaks in wood, concrete, plaster and carpet. Providing accurate moisture level readings make this tool great for new home inspections, locating roof leaks or even selecting dry lumber at the yard. Display will show the moisture content in Percent Moisture Content directly.

Calibration holes

How to calibrate

TECHNICAL DETAILS:

- Measures moisture content by detecting a material's electrical resistivity using two pins.
- Measurement output is displayed on a practical LCD screen.
- Instruction manual.
- Moisture measuring range: 5~50% (in wood); 1.5~33% (in building material)
- Measuring accuracy: ±2%
- Backlight shut off: Approx. 15 seconds
- Auto power off: After 3 minutes idle
- Battery:**Included**
- Battery Type:9V Battery Block (6F22 or 6LR6); Alkaline
- Low battery indicator: <7V
- Working current: <25mA
- Working temperature: 32°F~122°F
- Working humidity: <90%RH non-condensing
- Storage: -4°F~140°F ≤85% (without battery)
- Dimensions: 145 x 65 x 25mm (5-11/16" x 2-9/16" x 1")
- Weight: About 3oz (without battery)

DESCRIPTION	BOXES	ORDER NO.
Digital Moisture Meter	5	DMM-001

Spare parts DMM-001/1 Set 2 Pin for DMM-001

Digital Angle Gauge

DAG-001

The digital angle gauge is a mini waterproof digital protractor that provides digital readings between $\pm 90^\circ \times 4$ with a resolution of 0.1° and features auto shut off after 5 minutes. It is small enough to be carried around in your pocket and the LED screen is easy to read. It incorporates magnets in the base for adhesion to any ferrous surface to accurately measure mitre and bevel angles on mitre saws, saw benches, etc.

- Accurately sets saw blade bevel angle, works great for miter saws and table saws.
- Automatic LCD backlight
- Large display for easy digital reading
- Measurements in absolute or relative mode
- Angles displayed in degrees
- Automatic digit inversion for overhead measurements
- Set to ZERO
- Magnetic base
- Case included
- Instruction manual

Watch the video on **YouTube**

TECHNICAL DETAILS:

- Range: $\pm 90^\circ \times 4$
- Resolution: 0.1°
- Battery: **Included**
- Battery Type: AAA-1.5V; Alkaline
- Dimensions: $60 \times 60 \times 28\text{mm}$
($2\text{-}3/8" \times 2\text{-}3/8" \times 1\text{-}1/8"$)

DESCRIPTION	ORDER NO.
Digital Angle Gauge	DAG-001

Digital Angle Finder

DAF-001

This digital angle finder is a multi-functional tool for many measuring applications. Easy to operate, the base unit carries the electronics featuring clear detailed LCD display, a pair of levelling vials and a pivoting measuring arm. When the arm is extended, the angle created with the base is indicated clearly on digital read-out to the nearest 0.05° . The measuring range is $0 - 360^\circ$. The vials allow both vertical and horizontal variations to be accurately measured. Other features include a lock function to prevent the last measurement being lost, a low battery indicator and automatic shut off function. Robust yet lightweight, this tool is very versatile.

DESCRIPTION	ORDER NO.
Digital Angle Finder	DAF-001

Watch the video on **YouTube**

- Easy and simple to use.
- Calculates angles in seconds.
- Large detailed LCD display.
- Robust, lightweight aluminium construction.
- Instruction manual.

TECHNICAL DETAILS:

- Range: $0 - 360^\circ$
- Resolution: 0.05°
- Battery: **Included**
- Battery Type: ... CR2032-3V; Lithium Button Cell
- Dimensions: $260 \times 50 \times 25\text{mm}$ ($10\text{-}1/4" \times 2" \times 1"$)

Laminate/Veneered-Panel Cutter

A very useful hand tool for clean, splinter-free cuts on laminates and veneer with no waste. Place your material into the fence provided and run the cutter along the edge of the panel. The two opposing steel-made circular cutting blades mounted on roller bearings will trace the cutting line. Use the micrometer knob on the top of the tool to set the cutting thickness, or adjust the strip width by using the metric/inch scale provided. Loosen the lock knob on the scale, move the metal bracket which holds the fence and tighten the lock knob again on the desired cutting width.

DET-003

TECHNICAL DETAILS:

- Cutting width: 12~110mm (15/32" ~ 4-21/64").
- Cutting depth: 0~2mm (0 ~ 5/64").
- Weight: 1.2 kg (2.65 lbs).

DESCRIPTION	ORDER NO.
Laminate/Veneered-Panel Cutter	DET-003

Spare parts DET-003K Pair of cutters right-left for DET-003

Edge Banding Iron

Apply pre-glued edge banding easily and accurately. The iron non-stick surface allows smooth and easy application. The thermostatically controlled short preheat time gets you working quicker. Includes heat resistant metal base to place iron when not in use.

DET-004

FEATURES:

- Thermostatic heat control.
- Non-stick coating.
- Specially shaped shoe with rounded edges.
- Metal stand.

TECHNICAL DETAILS:

- Input: 110-230V (50-60Hz)
- Electric current: 0.3A
- High temperature: 180° ±10° C
- Plug type: C
- Power cord length: 1m
- Tool weight: 0.35 Kg

DESCRIPTION	ORDER NO.
Edge Banding Iron	DET-004

Edge Banding End Trimmer

An indispensable tool for easy and safe end trimming after edge banding. Position the tool on the banding, press down on the handle to operate the blade in a shearing action. The cutting knives are interchangeable, so when the cutting knife becomes dull, you can simply replace it with the anvil knife for a double lifetime. For cutting banding up to 0,5mm thick with a maximum cutting width of 54mm. This tool can also be paired up with our double edge trimmer **DET-001**. We recommend using our edge banding end trimmer **DET-002** before using our double-edge trimmer **DET-001**.

DET-002

DESCRIPTION	ORDER NO.
Edge Banding End Trimmer	DET-002

Diamond Whetstones

For professional, industrial and home users

DSS

FAST: real quality diamond, the hardest known material, reduces the sharpening process.

EASY: stoke the blade across the surface with little pressure.

DURABLE: we use natural diamonds for long-lasting performance.

VERSATILE: for sharpening any hard material, steel, glass, ceramic, tungsten carbide, etc.

FOR SHARPENING, HONING AND LAPPING

- axes
- bayonets
- broadheads
- cable cutters
- carbide cutters
- chainsaws
- chisels
- climbing equipment
- engraving tools
- farm and garden tools
- fish hooks
- Forstner bits
- knives
- lapidary tools
- lawn mower blades
- masonry drills
- moulds and dies
- plane blades
- planer /jointer knives
- pruners

- ring tool
- router bits
- saw blades
- scissors
- shears
- ski and snowboard edges
- small contact area and pointed tools
- speed and hockey skates
- woodcarving scrapers
- woodturning tools

FOR ABRADING HARD MATERIALS

- ceramic
- composites
- fiberglass
- glass
- stainless steel
- stone
- titanium
- tool steel
- tungsten carbide

FOR FLATTENING

- chisel backs
- engine heads
- machine bolsters and ways

A unique production process to guarantee long tool life

A perforated steel plate is moulded onto a strong plastic base by applying high pressure. The steel is then covered with natural diamonds embedded into a nickel plate. The pattern and diamond coating ensures fast sharpening, whereas the plastic indents hold the lubricating water and disperse the fine dust emitted by the diamonds during sharpening.

The diamond whetstones are available in four meshes for multiple purposes:

D15 EXTRAFINE/GREEN (9 microns, 1200 mesh)

To refine and polish sharp edges to razor sharp perfection. If you are new to sharpening or need your knife or tool edges as sharp as possible, this grain type is what you are looking for.

D25 FINE/RED (25 microns, 600 mesh)

To restore any slightly dull knife or tool edges to perfect sharpness. Professional chefs and gourmet cooks prefer using this grit grain, too. This product is perfect for the edge refinement process before micro-refinement and polishing.

D46 COARSE/BLUE (45 microns, 325 mesh)

To quickly restore dull and worn edges. Professionals who require faster cutting action and less edge refinement often use this medium grit grain.

D76 EXTRA-COARSE/BLACK (60 microns, 220 mesh)

Recommended for aggressive removal of metal and metallic residue on damaged tools or restore heavy-duty outdoor tools such as axes and lawn mower blades. This grit grain is commonly used as a first step for flattening the back of chisel and plane irons or for rapid stock removal from chipped or badly damaged edges.

INSTRUCTIONS

Use water for lubrication, after use, rinse and store dry.

1. Keep your knife with cutting edge away from you.

2. Apply some water to the stone surface. Hold blade 20° to diamond surface.

3. With little pressure and in long strokes push the blade across surface. From edge heel to edge tip, alternately on both sides. For pointed tools. Use the unperforated diamond area.

Bench Block Set

BBS-001

These blocks are great for holding your workpiece steady without resorting to the use of clamps. Their anti-slip surface grips adheres to both your bench top and the underside of your workpiece. By raising the workpiece off the main bench top, you automatically create extra clearance underneath so you can put your router bits and cutters conveniently to work!

Length: 75mm
Width: 50mm
Height: 25mm

DESCRIPTION	ORDER NO.
Bench block set (4-Pcs.) 75x50x25	BBS-001

Bit Organizer

100 bits at your fingertips

You always need your most used bits within reach! They also need to be safely organized. CMT offers a perfect solution for keeping them in order with a handy organizer. Conveniently holds up to 100 router or drill bits of any size with the use of a CMT interchangeable bushing to fit all shank diameters. See options listed below.

Formula 2050: Blade & Bit Cleaner

An incredibly effective cleaner for all cutting tools!

998

Saw shops know how to get the most out of cutting tools. They also know that pitch and residue build-up greatly shorten the life of carbide and compromise performance. We asked various blade sharpeners to test our **Formula 2050** and they all rated it as an excellent product. Why is it so effective? Because CMT's **Formula 2050** penetrates the microscopic cracks in the resin and attacks the bond between carbide/steel surface and the resin itself. **Formula 2050** keeps your tools in top-notch condition increasing lifespan between sharpening and replacement.

998.001.01

998.001.03

Prolonged use of this product may cause damage to special coating treatments applied to aluminum tool surfaces. Use with caution.

DESCRIPTION		ORDER NO.
0,5 lt. spray bottle	8	998.001.01
5 lt. plastic jug	2	998.001.03

- Removes pitch, resin and adhesive residue from all woodworking cutting tools (saw blades, router bits, drill bits, shaper cutters, planer blades, etc.)
- Do not rinse after cleaning. Formula 2050 provides protection from rust and corrosion. Keeps your table saw top rust-free, too!
- Can be applied by spray bottle or used in ultrasonic cleaners and dip tanks.

Contact our Sales Department for terms and conditions of delivery and minimum quantity orders.

Formula 998: Lubricant for Wood, Neutralizes Resin

- Neutralizes resin, preventing it from being stuck on chips and sawdust.
- Cleans knobs, barbell handles, etc.
- Anti-corrosion action on woodworking machine table.
- Excellent against humidity.

998

5 rubber studs at bottom

Carpenter Pencil & Ink Pen

An easy-grip shape and larger rectangular surface area means this pencil won't roll away or slip from your hands. The non-round core makes highly legible thick or thin lines.

Perfect for high precision tracing and marking virtually any surface. Easy to erase.

Strong break-resistance lead center withstands rough handling as well as the rigours and extreme conditions of the construction environment.

Deep Hole Mechanical Marker

- Tip length 45mm (05.7mm) for marking tight and hard to reach places.
- Push-feed button for automatic lead advancement with built-in sharpener.
- CMT refills O2.8mm insertable at tip or opposite end.
- Sturdy metal body and handy pocket clip.
- Marks a variety of surfaces, rough or smooth, dry, wet or dusty.
- CMT refills available in Graphite (2B) or Crayon (red & yellow), each marker includes one graphite lead.
- **Graphite** ideal for marking: Paper, Wood, Laminates, Masonry, Stone and Artificial Stone, Metals and Non-Ferrous Metals.
- **Crayon*** ideal for marking: Plastics, Ceramic, Glass, Paper, Wood, Laminates, Masonry, Stone and Artificial Stone, Metals and Non-Ferrous Metals.

*Colored leads are made of wax, which means they are softer and more fragile than graphite leads. Handle them with care.

Safety & Tools Rotation

SAW BLADE SAFETY

- ALWAYS** thoroughly check all blades for damage and flaws before using. Do not use blades with missing or damaged teeth.
- ALWAYS** wear safety glasses and ear protection when using power tools.
- ALWAYS** thoroughly read the owners manual and manufacturer's instructions before working with tools.
- ALWAYS** secure the blade using flanges of the same diameter and of maximum diameter possible, but at least 1/3 of the blade diameter.
- ALWAYS** use a fence and splitter when using the table saw. Do not make freehand cuts.
- ALWAYS** use pusher blocks or a pusher stick, especially when working with small or narrow pieces.
- ALWAYS** unplug your saw before cleaning or adjusting the tool, or before making blade changes.
- ALWAYS** keep your tools sharpened, clean and stored in a safe place to avoid breakage and accidents and to extend the life of your bits and blades.
- ALWAYS** feed the workpiece against the rotation of the blade on table saws.
- ALWAYS** be sure your workpiece is completely supported, before and after the cut.
- NEVER** remove guards from radial arm saws and miter saws.
- NEVER** remove the splitter or anti-kickback devices from table saws.
- NEVER** use dull or damaged blades.
- NEVER** use blades with missing or chipped teeth.
- NEVER** force the cut or overload the saw.
- NEVER** change blades with the saw is plugged in.
- NEVER** make adjustments to any saw while the blade is rotating.

For the complete table of MAX RPM, please visit the Downloads area of our website.

CUTTER HEAD SAFETY

- ALWAYS** thoroughly check all cutters for damage and flaws before using.
- ALWAYS** wear safety glasses and ear protection when using power tools.
- ALWAYS** thoroughly read the owners manual and manufacturer's instructions before working with tools.
- ALWAYS** use guards that were supplied with your shaper.
- ALWAYS** use a fence with your shaper. Do not make freehand cuts.
- ALWAYS** use pusher blocks, especially when working with small or narrow pieces.
- ALWAYS** unplug your shaper before cleaning or adjusting the tool, or before making cutter or knife changes.
- ALWAYS** be sure the spindle nut is tight before plugging in the shaper.
- ALWAYS** check that knives are properly and securely installed in the cutterhead when using interchangeable-knife systems.
- ALWAYS** keep your tools sharpened, clean and stored in a safe place to avoid breakage and accidents and to extend the life of your bits and blades.
- ALWAYS** feed the workpiece against the rotation of the knives.
- ALWAYS** be sure your workpiece is completely supported, before and after the cut.
- NEVER** remove guards or any other safety devices from your shaper.
- NEVER** use dull or damaged knives.
- NEVER** force the cut or overload the shaper.
- NEVER** change cutters or knives or make adjustments with the shaper plugged in.
- NEVER** make adjustments to the shaper while the cutter is rotating.

For specific RPM range, follow marking on the cutter heads.

ROUTER BITS SAFETY

- ALWAYS** thoroughly check all tools for possible flaws before using.
- ALWAYS** wear safety glasses and ear protection.
- ALWAYS** thoroughly read the owners manual and manufacturer instructions before using.
- ALWAYS** check that at least 75% of the shank is securely inserted into the collet of the router.
- ALWAYS** use template guide collars when possible to absorb lateral bit deflection.
- ALWAYS** use a fence when working on the router table.
- ALWAYS** reduce the router speed when working with larger diameter bits.
- ALWAYS** keep your fence adjusted so there is some clearance between the bearing guide and the workpiece.
- ALWAYS** take care to remove large quantities of stock (cross section > 10mm) in more than one run.
- ALWAYS** keep your tools sharpened, clean and stored in a safe place to avoid breakage and accidents and to extend the life of your bits and blades.
- NEVER** use dull or defective tools, even suspiciously defective.
- NEVER** force the shank entirely into the collet (bottoming out). Leave about a 3,2mm (1/8") space from the bottom.
- NEVER** force the bit into your router or overload the router.

For specific RPM, follow info on router bit packaging.

Explanation of Symbols

Tungsten Carbide Tipped	Solid Tungsten Carbide	Insert Carbide	Carbide Grit
Alloyed Tool Steel	High Speed Steel	High Performance Steel	High Carbon Steel
High-Alloyed Tool Steel	Heavy-Duty Steel 44 HRC	Bimetal with 8% Cobalt	Bimetal with 8% Cobalt + TiN Coated Teeth
Inox	Carbide TiN	Polycrystalline Diamond	Diamond Grit
One Cutting Edge	Two Cutting Edges	Three Cutting Edges	Three Cutting Edges with Chipbreaker
Four Cutting Edges	Six Cutting Edges	Twelve Cutting Edges	One + One Cutting Edges
Two + One Cutting Edges	Two + Two Cutting Edges	Three + Three Cutting Edges	Four + Four Cutting Edges
Six + Three Cutting Edges	One Spur	Two Spur	Four Spur
Right-hand Rotation	Left-hand Rotation	Right-hand & Left-hand Rotation	
Antikick-back	Radial Relief	Tool with Plunging Capacity	Tool with Bearing
Upcut Bit	Downcut Bit	Upcut & Downcut Bit	Axial Angle
Mechanical Feed	Manual Feed	Flush Trimming	Grooving, Sizing
Rebating, Profiling, Beveling	Slooting	Spiral Boring	Avoid Axial Plunging
Not for Hand Held use for Router Table only	Standard Precision Run-out 0.015	High Precision Run-out 0.005	Antikick-back
ORANGE CHROME®	Non-Stick Orange Shield Coating®	Nickel Coating	DLCS CHROME COATING
VAPO Heat Treatment	TiCN Coating	Saw Blade with Dampening Slots with Fill	Saw Blade with Dampening Slots without Fill
Cardboard Box for Saw Blades	Clamshell Carry Case for Saw Blades	Plastic Carry Case for Saw Blades	Plastic Box for Cutter Head
Long life	2X/4X Cutting Edge	20X/40X Longer Life Than Carbide	50X/60X Longer Life Than Carbide
Wear Five Finger Gloves	Wear Safety Glasses	Wear Ear Protection	Wear Dust Mask
Wear Safety Shoes	Wear Safety Helmet	Warning	

Conditions of trading

PREMISE C.M.T. products are the result of technological innovation achieved through continuous research applied on a vast scale. Drawings, technical data, photos of the products and packaging are supplied for the sole purpose of informing the customer and are not binding in any manner. **C.M.T.** may undertake, when necessary, modifications and improvements without applying these innovations to the parts already supplied. The operational tolerances conform to technical standards that are acceptable for this range of tools.

ACCEPTANCE OF THE CONTRACT All orders for our products are meant to be accepted at the price and sale conditions that are legally in force at the date of delivery.

Every order will be treated and supplied according to the following general sale conditions. By placing an order or accepting an offer, the customer accepts, without any reservations, all conditions expressly mentioned hereafter.

Any other derogation will only be accepted upon written consent by **C.M.T.** All other cases not contained within these conditions will fall under the Italian Civil Code.

Offers and order confirmations will be processed according to stock availability. Any order, even those taken by our representative agents, will be subject to our acceptance, which could also be a partial one.

We will notify the acceptance of any order by an order confirmation in which we will indicate all details pertaining to the items purchased, their price and expected delivery date. Therefore, we will not be able to accept any modification after three working days from the date of receipt.

MINIMUM AMOUNT ACCEPTABLE C.M.T. will only be able to accept and process orders for a minimum net amount of €100,00.

In case of acceptance of the order, we will add €15,00 for shipping and handling.

PRICES The prices stated in **C.M.T.'s** quotation and price lists are gross and are intended to be "ex-works".

Prices and VAT will be those in force at the date of shipping. To the best of our knowledge, the prices indicated in our catalogues, price lists and order confirmations are correct. However, **C.M.T.** cannot be held legally liable for reserving the right to change prices without notification in line with the manufacturer's cost increases.

DELIVERY Delivery dates in the order confirmation are given as an indication of the estimated delivery time. They have to be considered as reliable only in case of normal operating conditions, and there shall be no liability on the part of the Seller for any failure to deliver due to causes beyond the Seller's control. **C.M.T.** will also not be able to accept any cancellation of existing orders which were not delivered in time due to external impediments.

Standard products will be shipped within five working days from receipt of the order.

SHIPPING AND HANDLING The packing of our products will be charged on the final invoice, while shipping is "ex-works" from our factory at Chiusa di Ginestreto (Pesaro).

All products supplied by C.M.T. travel at the customer's own risk.

C.M.T. retains the right to charge freight costs on the invoice in case of value under the minimum amount acceptable of €100,00.

C.M.T. will not be held responsible for any damage, theft or tampering that might occur during transport, and for which the forwarder will be legally liable according to article 1693 of the Civil Code. The customer, for his part, will have to check the goods at the moment of receipt and, in case any anomaly or damage is found, he will have to apply for a refund to be addressed to the forwarder.

PAYMENT Cash payments can only be accepted for purchases done directly at the **C.M.T.** factory located in Chiusa di Ginestreto (Pesaro) in accordance with article 1182, sub-section 3 of the Civil Code, or upon delivery of the goods provided there is a written agreement between the parties.

Deferred methods of payment will have to be previously agreed with the Seller. In this case, if one or more instalments are not paid, the agreement will automatically expire according to article 1186 of the Civil Code.

A delay in payment, even partial, will automatically incur interest in the amount of an extra 5% to be charged to the customer's account.

In case of non payment, **C.M.T.** reserves the right to suspend any further supply of its products.

WARRANTY All professional tools by **C.M.T.** are manufactured according to high standards of technology and are therefore warranted against any possible defect. This warranty does not cover damage or tampering which can be ascribed to inappropriate use. It is also not applicable for tools that have been re-sharpened.

This warranty does not cover the possible injuries resulting from inappropriate use of defective tools.

C.M.T. will repair or replace any goods which the buyer shall prove to have been defective in material or workmanship upon analysis by its technical department. Any complaint must be communicated within fifteen days from receipt of the goods together with a written form in which the customer provides a detailed description of the defect. Any return of tools will only be accepted upon authorisation by **C.M.T.** and the freight will be at the customer's own expense.

CMT DEFECTIVE TOOLING OR SHIPPING ERROR RETURN POLICY CMT accepts the return of tools that are defective or have been shipped in error. All returned tools require proof of purchase, prior approval from a CMT Manager and a return authorization number, issued by C.M.T. UTENSILI SPA, PRIOR to returning.

10% restocking fee: If tooling is in like new condition (no damage to packaging or tooling, restrictions or other terms may apply).

Shipping: Returning dealer is responsible for all cost associated to shipping product back to CMT.

OWNERSHIP RIGHTS All rights are reserved in accordance with Italian law and with international agreements, and the whole or any part of this catalogue may not be reproduced in any way or form.

PLACE OF JURISDICTION For any legal matter the place of jurisdiction is Pesaro.

All contracts, even those made with foreign Buyers or for goods to be sent abroad, are regulated by Italian legislation.
